It is with great pleasure I give my first report as President of the College. I congratulate Professor Fee on his most successful term as President.

22 Merrion Square

This year marks another milestone in the College's development. Our mortgage has been cleared and our tenant indicated his intention to leave before the end of December 2006. In January 2007 the College will take possession of 22 Merrion Square in its entirety. College Council has engaged architects to plan the development of additional modern educational facilities at the back of 22 Merrion Square.

Education and Training

This is the College's core function and the continued expansion and development of the MSc. and all of our other courses continue. After much consultation the MSc. is being revamped towards the end of 2006. The new MSc. will build on the strengths of what currently exists by the addition of new modules. This allied with the other changes we trust will add value relevance and appeal to the MSc.

My first function following my election to the Presidency was to attend the College Tutors' day. This was very well attended and the discussion and active participation by all on the day was excellent. The College's determination to gain defined contractual time for our trainers and tutors remains.

The College has obtained funding through the HSE-METR group for a number of educational and training opportunities. Funding for an airways skills course has been obtained and also the purchase of equipment for the vascular access course

has been resourced. The College independently has also purchased two simulators for use in education, training and in the primary FCARCSI OSCE scenarios.

The College successfully hosted the UEMS (Anaesthesia division) this year. The Autumn College Lecture was given by Professor Philip Routledge and was held as usual in conjunction with a very successful Joint Core Topics day in Belfast. The Winter College Lecture was given by Professor Mark Warner and was held as part of a most successful Anaesthetic weekend, which included the Legal Medicine workshop, The GlaxoSmithKline Medal Presentations and the AAGBI Irish Standing Committee meeting.

Examinations

As can be seen from the report of our Chair of Examinations Dr. Ellen O'Sullivan, the exams continue to grow and retain their popularity. The College now runs six exams every year and these are over subscribed. Our thanks to the chairs of individual exams and all our examiners without whom the exams would not function.

Management and Administration

Most will have met Dr. Orlaith Mc Caul, our Registrar. She, along with our staff ensures that the College functions and provides the service to our Fellows and trainees. 2006 has seen the resignations of Mrs. Sue Ryan, Ms. Maura O'Mahoney and Ms. Helen Kerrane, with Ms. Maria Pongracz and Ms. Ruth Kilgallon joining the College. Our staff, under the management of our Registrar, places the College in a very strong position to meet the challenges that lie ahead.

Dean's Office

Our Postgraduate Dean, Dr. Ian Surgeon, continues to develop the education and training functions of the College. We are indeed fortunate to have Ian as our Dean as he brings both clinical and academic expertise to the post. His development of the website continues along with the ongoing development of a modern IT based education management and training system for the College.

Overseas Activities

Our involvement with the Overseas Qualifying Exam and Course in Oman continues for the present. This is kept under constant review in light of developments here at home. The College continues its sponsorship of the Malawi education project for Medical Officers in Anaesthesia and a team is going out in January 2007 to continue with this worthwhile effort.

TRAS Exemption Scheme

This continues subject to constant evaluation. The stricter criteria brought in last year for its operation are working well and the objectives of the scheme are being met at present.

Corporate Support

The new regulations regarding corporate support are in place and we anticipate that the relationship between the College and the business world can be further developed to the benefit of education and training and ultimately patient care.

Honorary Fellowships

On 11th May 2006, Dr. Peter J. Simpson and Prof. Mike Harmer were awarded Honorary Fellowships, while Dr. John M. Murkin and Dr. Peter D. Slinger were awarded Fellowship By Election.

In the latter half of 2006, the following were invited to accept Honorary Fellowships and it is our intention to confer them in 2007:

Dr. Johannes (Hans) Theodorus Antonius Knappe
 Dr. David Kenneth Whitaker
 Dr. Judith Ann Hulf

Acknowledgments

I would like to thank Council Members, Chairs of committees' workshops & courses and our Honorary Secretary, Treasurer and Vice President for all their support and advice. My thanks also to our Postgraduate Dean and our Registrar. The College is entering changing times and many challenges lie ahead. It is vital that our fellows participate in the College and its activity and become involved in developing and shaping the future.

Our website www.anaesthesia.ie affords all our fellows a platform to air their views, ideas and comments. I invite you to use it. I look forward to serving you for the next two years.

Dr. John McAdoo
 President

2006 was an important and eventful year for the College of Anaesthetists. The productivity was due, in no small part, to the dedicated and capable staff that I am delighted to work with in the College. The College Council met on five occasions, the Sub-Committees of Council met thirty five times. Six examinations were held for eight hundred and fifty candidates. We conducted three workshops, five courses and ran five meetings at which over eight hundred people attended showing a fifteen percent rise in attendance on 2005.

In 2006 the Council decided to transform the College and we are delighted with the prospect of the planned renovations for the premises at 22 Merrion Square. We are confident that with the availability of excellent new meeting facilities we will be able to hold many of the bigger meetings in-house that have traditionally been held in venues outside the College. In addition to the renovation of the offices and meeting rooms in Merrion Square, a new Education Centre is also planned which is to be sited on Denzille Lane. This Centre will undoubtedly provide us with many opportunities to expand the scope of our activities for the Specialty into the future.

It is part of the function of the College to set the standards for Anaesthesia training in Ireland and continual progress has been made in articulating the knowledge, skills and competencies expected of

Anaesthetists in training. We are actively reviewing the College's educational direction and efficiency of our education and training activities. With the support of the many College Tutors, the Academic Anaesthesia Committee and the Regional Training Schemes it is envisaged that our educational developments will be informed, cohesive and will ensure excellence.

In 2006, the MSc. in Anaesthesia was restructured and renamed MSc in Medical Professionalism (Anaesthesia). The first intake on the new course will be in September 2007. This postgraduate programme is open to all Consultant and trainee Anaesthetists. It may be taken on a part-time or on a modular basis. The MSc., which is awarded by the National University of Ireland carries with it credits which are verified within the National Framework of Qualifications. These credits are recognised nationally and internationally. It is also accredited by the College of Anaesthetists for Continuing Medical Education points.

Financially, 2006 has been a healthy year for the College. It is our aim to provide education and training to our trainees within a financially efficient framework. In our prudent financial management we endeavour to ensure that we meet this objective. Through subscriptions, donations and with the support of the Postgraduate Medical and Dental Board, in

2006 we have been able to meet the revenue requirements to sustain the College activities.

The education and health service environment in which we work is changing rapidly. As an education and training provider, an examining body and as the organisation that sets standards for Anaesthesia practice we are working hard to ensure excellence. The publication of the Medical Practitioners Bill in 2007 will bring with it new challenges to the College not least in ensuring adequate systems to support and enhance opportunities for Continuing Medical Education. The adequacy of these structures will be dependent on the investment of significant resources.

We are working with the new structures of the HSE and in the context of the policy decisions arising out of the Hanly and Buttimer Reports. We are addressing the challenges of providing education and training to NCHDs in light of the European Working Time Directive and anticipated Consultant led provision of medical service. To this end we are further utilising Information Communication Technology and are developing a centralised repository of educational materials. We plan to have an electronic logbook for trainees and have invested in two high fidelity simulators, which are currently being used for teaching purposes. Furthermore we are

collaborating with other postgraduate medical education and training providers to ensure the widest range of learning opportunities are available to our trainees.

I would like to express my extreme gratitude to the College Council and all the members of the College Committees who work tirelessly on a voluntary basis on behalf of the College. Finally I would like, in particular, to thank the Honorary Officers who have been most supportive of the new role of Registrar here in the College.

[Dr. Orlaith Mc Caul, Registrar](#)

A great deal of my day-to-day activity is mirrored in the reports of the Training, Examination and Education Committees and I will not duplicate it here. Over and above this activity, a lot of time and effort has been expended in 2006 in preparing submissions to the HSE for funding support; for following through on supported projects; for preparing progress reports and final accounts for many of the projects which are detailed below; and for preparing submissions for 2007.

Human Factors

This course is organised by RCSI and funding goes to them. Seventy-five anaesthesia BSTs are currently enrolled and a Tutor post is shared between two Consultant Anaesthetists. Our College has deemed this course mandatory for all basic specialist trainees.

Essential Airway Skills.

Budget €16,000

Thirty-eight SpRs attended this well-run course in October 2006. The College has decided to make it mandatory for all SpRs. Invoices received equal available budget of €16,000.

Modular Basic Anaesthesia Training Programme.

Budget €77,000

The IT platform for this project has been developed and content is currently being recorded. There is €14,711 as yet unused in this project however there are several recording dates booked (for ten modules) in December 2006, which will generate invoices from the Video Recording company, and most of the module content developers have yet to submit invoices. Thus it is anticipated

that most, if not all, of the remaining budget will be used in 2006 and also that outstanding modules will generate further costs in 2007.

Handover Errors in ICU.

Budget €69,000

This project has commenced in the Mater Hospital, and by agreement is scheduled to run into 2007. It is expected that Salary Costs (including non-pay costs) for a nurse up to end-December 2006 and for an SpR from January 2007 can be paid directly from the HSE in arrangement with the Network Manager at the Mater.

Online Training Assessments.

Budget €12,000

This project is complete from a software and website viewpoint, and is awaiting completion of an upgrade of the College's database software system, with which it must interact. At €13,878, costs for this project have marginally exceeded the approved sum of €12,000.

Online Journal Access.

Budget €6,000

Access is now available via the College website to selected Journals in Anaesthesia, Intensive Care and Pain Medicine, via the Athens secure authentication system. We hope to add some more titles before the end of 2006, which would use up the remaining budget, however this is a technically difficult process and not all publishers will agree to this type of online access.

SpR 4/5 post for Register of Medical Specialists.

Budget €105,000

A Temporary SpR year 4/5 has been appointed to this post following competitive interview. He will commence a two-year rotation in January 2007. Again, as in the case of the salary in project (d) above, it is expected that salary and non-pay costs can be arranged directly between the HSE and the hospitals concerned.

TIPS for Teaching Course.

Budget €16,100

This course ran over two days at the end of October 2006 and is scheduled again for March 2007, for sixteen attendees on each occasion. Invoices are under budget for 2006/7. This is due to course development costs not being included for 2006-2007, but which were incurred at start-up in 2005-2006.

Training Portfolio.

Budget €15,000

This project is complete and trainees will be issued with Portfolio books from January 2007 in which will be recorded all training activities and assessments over the seven year programme. At €18,755, this project has exceeded budget by €3,755.

Vascular Access Workshop.

Budget €16,000

This course had already run in 2006 prior to funding submissions, so by agreement it is to be funded in 2007. It is scheduled to run in February 2007. Again, similar to the Airway Course at (b) above, the College will be making this course mandatory for all SpRs.

College Tutors Day.

Budget €6,500

This course took place at the end of June 2006. Twenty-five attendees were updated on current College policies and procedures, and there was a useful interchange of views between tutors and the College. The total spend was slightly under budget, however not all tutors submitted travelling expenses.

The HSE has also agreed to provide capital funding of €140,800 for the purchase of equipment to support the Essential Airways Skills and Vascular Access courses.

Of further note is that the College acquired two "Sim Man" simulators during 2006. These were used successfully at the Essential Airways Skills course and at an OSCE station in the Primary FCARCSI examination, both in Autumn 2006.

There have been problems with the implementation of the College's database system, which are currently being addressed, concurrent with a software upgrade. The final implementation should be available for user acceptance testing in March/April 2007.

The College website now has a secure login for members and contains a great deal of useful and reference information, as well as allowing members to update their personal information. It will be further enhanced in the near future when several of the projects listed above become live on the site.

Dr. Ian Surgeon

Postgraduate Dean

Examinations Committee Members:

Dr. Ellen O'Sullivan,
Dr. John McAdoo,
Dr. David Hill,
Dr. Henry Frizelle,
Dr. Jeanne Moriarty,
Dr. Brian Marsh,
Dr. John Loughrey,
Dr. Catherine Motherway,
Dr. Joe Tracey,
Dr. Ken Lowry,
Dr. Philip Hawthorne,
Dr. Julian Johnston,
Dr. Ellie O'Leary,
Prof. Denis Moriarty,
Prof. George Shorten,
Dr. Carlos McDowell,
Dr. Liam Conroy,
Dr. Ian Surgeon,
Dr. Orlaith Mc Caul.

I am delighted to present the Annual Report of the Examinations Committee for 2006. The year was again an extremely busy one. It was also a very successful year for the Examinations Committee. I would like to take this opportunity to pay tribute to the members of the Committee for their support, hard work and dedication throughout the year. I wish also to thank our Examiners for their continued diligence, interest and support for all of the College of Anaesthetists' Examinations. The Primary and Final FCARCSI Examinations continue to experience an enormous demand for places on each respective Examination. We managed to create 20 additional places for the Primary FCARCSI Examination in October 2006. Demand continues to exceed the number of places available.

In January 2006 we ran the Overseas Qualifying Examination (OQE) in Oman. It is our intention to run another OQE in

January 2007. I wish to thank again all the Examiners for their support in this regard.

The Pain Medicine Diploma Examination was run in Cork 15-16th June 2006. This was another great success and I would like to extend our thanks to Dr. Liam Conroy and the staff at the Mercy University Hospital Cork.

I would like to thank the following respective Chairs of the Examinations: Dr. Henry Frizelle, Chairman of the Primary FCARCSI Examination, Dr. Julian Johnston, Chairman of the Final FCARCSI Examination, Dr. David Hill, Chairman of the Pain Medicine Diploma Committee, and Dr. Liam Conroy, Chairman of the Pain Medicine Examination Committee.

We introduced a new simulator station in the OSCE section of the Primary examination in October 2006 and this was very well received. The COA has purchased two new simulators, which will be used for future examinations and courses.

Model answers are now available on the website for the Final FCARCSI Examination candidates. An enormous amount of work has gone into getting a databank of questions and answers completed for both the Primary and the Final FCARCSI Examinations.

Lastly I would like to extend our gratitude to our Examinations Office staff, Marguerite Harvey, Examinations Officer and Barbara Conneely, who have both worked so hard to ensure the smooth running of every aspect of the examinations.

Dr. Ellen O'Sullivan
Chairperson, Examinations Committee

National Training Committee Report

National Training Committee Members

Dr. Catherine Motherway
Dr. Ellie O'Leary
Dr. William Blunnie
Dr. Rory Dwyer
Dr. David Hill
Dr. Kevin Carson
Dr. Sean McDevitt
Dr. Philip Hawthorne
Dr. Ellen O'Sullivan
Dr. Jeremy Smith
Dr. Joe Tracey
Dr. John McAdoo
Dr. Jeanne Moriarty
Dr. Brian Marsh
Dr. John Loughrey

The Training Committee meets on five occasions annually with many additional meetings of subcommittees, interviews panels and meetings with outside agencies. The committee includes representatives from the College Council, the Regional Training Programs, the Royal College of Anaesthetists, the AAGBI and the Association of Anaesthetists in Training.

SpR program

Nineteen trainees completed their training in 2006. They were:

Nabil Alaoubda
Siún Burke
Daniel Collins
Edel Duggan
Kate Fitzgerald
P Gnagnamoorthy
Niamh Hayes
David Hourihan
Philip Hu
Oleg Ilyinsky
Muhammad Jamil
Alan Lane
Mohammed Maghrabi
Saad Mahdy
Martin Stephen Mannion
Shehzad Mehmood
Paul Murphy
Dónal O'Croinín
Mohammad Zafruddin

The Committee wishes them every success in their future careers. Sixteen new SpRs were appointed to the substantive program. Nine temporary SpR4/5s were also appointed. Of note one of these posts is now separately funded by the DOH. There are now 93 SpRs on the programme of whom 18 are on leave. Most are working in clinical/research fellowships abroad or in Ireland. Two SpRs are undertaking part time training funded by the flexible training program of the PMDB. All trainees are interviewed at end of Year Three to approve subsequent entry into Year Four and at exit to approve their accreditation for CST. The officers continue to interview trainees with below average assessments to provide constructive advice. Trainees continue to submit reports on hospitals, providing feedback on training quality in each hospital. This information is distributed to the hospitals on an annual basis, and is made available to inspectors prior to hospital inspections.

The TRAS exemption Scheme continues to sponsor approximately 60 doctors occupying BST posts around the country. The regulations for this scheme are available on the college website. Dr. Carlos Mc Dowell continues to coordinate the scheme on behalf of the college. The College Tutor system is now well established and the group met again in early 2006 to exchange views and give feedback to the college on issues pertinent to training

The college continues to work with the National Implementation Group on the EWTD to access the training implications of trial rosters in a number of pilot hospitals.

Competency assessment is now an integral part of training with completion of the CCBST a requirement prior to taking up an SpR post. Competency documentation for SpR training is now approved and will commence in 2007. Portfolios books have been produced. These will assist trainees in directing their training and act as a permanent record held by the trainee with copies sent to the college of all documentation required for CST. Funding from the DOH of over €300,000 for the projects for training was again granted in 2006. A summary is included in the Postgraduate Dean's Report.

The website www.anaesthesia.ie contains vital information for all trainees and trainers. The site and regulations are updated regularly but trainees should get updated advice directly from the college with any queries.

The committee is aware that the training is provided by the trainers on the ground in each hospital and is grateful for their continued enthusiasm, hard work and commitment.

Dr. Catherine Motherway
Chairperson, Training Committee

Education Committee Report

Education Committee Members

Dr. Joseph Tracey
 Dr. William Blunnie
 Dr. Philip Hawthorne
 Dr. Ken Lowry
 Dr. Sean McDevitt
 Dr. Catherine Motherway
 Dr. Ellie O'Leary
 Dr. Kevin Carson
 Dr. Henry Frizelle
 Dr. Julian Johnston
 Dr. John McAdoo
 Dr. Jeanne Moriarty
 Dr. Brian Marsh
 Dr. John Loughrey

The past year has been a busy one for the Education Committee with a large number of courses, workshops, lectures, competitions and the Irish Congress of Anaesthesia. The Committee met five times during the year on Wednesday 8th February, Wednesday 5th April, Wednesday 21st June, Friday 1st September 2006 and Wednesday 1st November 2006 and reported back to the Council and the President. The members of the Committee are: Dr. Joseph Tracey, Chairman, Dr. John McAdoo, Dr. Henry Frizelle, Dr. Brian Marsh, Dr. William Blunnie, Dr. Philip Hawthorne, Dr. John Loughrey, Dr. Kenneth G Lowry, Dr. Sean McDevitt, Dr. Jeanne Moriarty, Dr. Catherine Motherway, Dr. Ellie O'Leary, Dr. Ellen O'Sullivan, Dr. Kevin Carson, Dr. Julian Johnston, Prof. Howard Fee, Dr. Ian Surgeon and Dr. Orlaith Mc Caul.

College Workshops

Again this year all of the workshops proved to be very popular and most were oversubscribed. The first one of the year was the Vascular Access Workshop run by Dr. Alan McShane on the 15th February 2006 following shortly by the Echocardiography Workshop run by Dr. Michael Griffin on 24th February. A

Difficult Airways workshop was held on October 4th in the Burlington Hotel as part of the DAS meeting and was organised by Dr. Ellen O'Sullivan. The Ethics and Legal Medicine Workshop was held in 22 Merrion Square on the 17th November organised by Prof. Anthony Cunningham. The Obstetric Workshop for BSTs in the Mater Hospital was held on 8th December 2006 and organised by Dr. John Loughrey. Two successful Train the Trainers courses were run this year on 30-31st March and 26-27th October 2006.

Delaney Medal Presentation

The Delaney Medal presentation took place in the Conrad Hotel on Thursday 2nd March 2006. The adjudicators were Dr. Aiden Synott (Beaumont) and Dr. Catherine Motherway (Limerick). Technopharm sponsored the reception, which was held afterwards in the Conrad Hotel. The winning presentation was by Dr. Michael J O'Dwyer entitled "The occurrence of severe sepsis is related to distinct patterns of cytokine gene expression".

Abbott Scholarship

The Abbott Scholarship in Anaesthetic Research was held on Friday 3rd March 2006. Abbott Laboratories once again provided €10,000 for a scholarship to support original research by an anaesthetist in training in Ireland. The judges were Dr. Ian Orr (Craigavon) and Prof. George Hall (London) and Prof. Ian Young (Belfast). The presentations were held in the Dr. Wallace Abbott Seminar Room at the College of Anaesthetists. The winning presentation was by Dr. Martin Duffy entitled "Modulation of endothelial dysfunction in the development of sepsis-induced acute lung injury by hydroxyl-methyl coenzyme A reductase in inhibition with simvastatin".

Irish Congress of Anaesthesia (ICA)

This was held 11-12th May 2006 in the O'Reilly Hall, Belfield Campus, UCD, Dublin 4. The meeting covered a broad range of topics and also included a session devoted to Ophthalmic Regional Anaesthesia. The faculty included speakers from Canada, Sweden, Germany and the United Kingdom as well as a number from Ireland.

The Gilmartin Lecture on the Thursday evening was given by Dr. John A. Hillery, President of the Medical Council of Ireland and was entitled "Professional Self-Regulation in the 21st Century: Hall-mark or outdated artefact?" Following the Gilmartin Lecture, the Annual Dinner of the College of Anaesthetists was held in the Four Seasons Hotel, Ballsbridge.

Autumn College Lecture

This lecture was again integrated into the Core Topics Day meeting, which was held in the Waterfront Hall in Belfast on 27th September. This meeting is a joint effort between the R.C.A. and the College of Anaesthetists. It was organised by Prof. Rajinder Mirakhur. The Autumn College lecture this year was given by Prof. Philip Routledge of the University of Wales in Cardiff and was entitled "Herbal Medicines and the Anaesthetists".

Winter College Meeting

Friday 17th November was a busy day with the Ethics and Legal Medical workshop held in the morning in 22 Merrion Square. The afternoon activities took place in the Albert Theatre, RCSI, and started with the GlaxoSmithKline (GSK) Medal Presentations. This was followed by a reception.

The evening finished off with the Winter College Lecture, where Prof. Mark Warner from the Mayo Clinic Rochester, Minnesota, USA delivered the Winter College Lecture and the title was "Perioperative Neuropathies, Blindness, and Positioning Problems".

Ethics and Legal Medicine Workshop

This workshop was organised by Prof. AJ Cunningham and Dr. Joseph Tracey. Speakers included Mr. Asim Sheikh, Barrister, "Medicine and the Law - A Personal Perspective"; Mr. Terence Moran, Solicitor, "Preparing a Medico-Legal Report"; Dr. Conor O'Keane, Consultant Pathologist, "Preparing for Appearance in the Coroner's Court"; Prof. Anthony J Cunningham, Consultant Anaesthetist, "Consent and Patient Autonomy - Case Presentation"; Dr. Deirdre Madden, Lecturer in Law, "Ethics in Medical Practice"; and Mr. William Kennedy, Medical Council, "Professional Standards/Fitness to Practice Committee".

GSK Medal Presentation

This competition is organised by the Anaesthetists in Training in Ireland group and is aimed at trainees in their first few years. The adjudicators were Prof. Anthony Cunningham (Beaumont), Dr. Eleanor O'Leary (Galway) and the ATI representative Dr. Brian Pickering. The winner of the GSK Medal Presentation was Dr. Amer Iqbal Jaura and his presentation was entitled "Anaesthetic Management Of Acute Tracheoesophageal Tear in a Polytrauma Patient by Bilateral Endobronchial Intubation".

College Courses

The introduction to Anaesthesia course for new trainees was held in the college on 31st August and in Beaumont Hospital on 1st September and was run by the Postgraduate Dean, Dr. Ian Surgeon. He also organised a 'Beginners Welcome' course on 9th January 2006 & 5th July 2006.

The Primary FCA Revision Course was held in Merrion Square 4–6th September and was organised by Dr. Ken Lowry, Dr. Ian Surgeon and Dr. Liam Conroy. The same three speakers also ran a very successful OQE Revision Course in Oman in November 2006.

The Final FCA Revision course was held 23rd–27th January 2006. This was run in the College of Anaesthetists, St. Vincent's Hospital, St. James's Hospital, The Mater Hospital and Beaumont Hospital. This was organised by Dr. John Loughrey.

Dr. Joseph A. Tracey

Chairman, Education Committee

Hospitals inspected in 2006 were as follows:

Clonmel Hospital

Co. Tipperary

Coombe Women's Hospital

Dublin

James Connolly Memorial Hospital

Dublin

Mater Misericordiae University Hospital

Dublin

Midlands Regional Hospital

Mullingar

Midwestern Regional Hospital

Nenagh, Co. Tipperary

Our Lady's Hospital

Cashel, Co. Tipperary

St. James's Hospital

Dublin

St. Josephs Hospital

Dublin

South Infirmary / Victoria Hospital

Cork

Tralee General Hospital

Kerry

The process of hospitals inspections plays a central role in the overall structure and maintenance of high standards of Anaesthesia training in hospitals throughout the country. It contributes to fulfilling the statutory role of the College of Anaesthetists in the supervision of this training. Each hospital with recognised training posts is required to be inspected once every five years. Furthermore hospitals may seek an additional inspection to gain recognition for either more training posts or recognition of the suitability of the training to more advanced trainees. This usually follows changes in the case mix or new consultant appointments with concomitant broadening of the training opportunities. The inspection can also assist individual departments in quality control of their training, and in their pursuit of extra consultant resources and funding from their management to ensure that they are providing the best possible environment for training.

Firstly I must thank all the members of the College Council and Training Committee for assisting me in this work. At least two members from this group are involved in each one of these inspections. I am also grateful for the administrative back up provided by the College for this activity. The inspection has a number of components. A detailed inspection application form is available from the College. Preparation for the inspection by a department is essential. Guidance on the issues likely to be raised at the inspection is available on the college website. A presentation on all the activities within a department may be a useful starting point for the inspection.

It may also be helpful to have a summary of the various agreed checklists, protocols and guidelines used by the department. This can greatly enhance the efficiency of the inspection and make best use of the inspectors' limited time in the department being inspected. It also helps ensure that all-important matters are addressed and that the inspectors depart with all the information needed for their report.

The report and recommendations are then discussed at the training committee meeting and if agreed are then forwarded to the hospital.

Future Development:

Hospital inspections are currently being reviewed with the purpose of making the whole process more robust. This will most likely involve a more rigidly structured inspection with a single data collection sheet. Meetings with the management of the hospital, the consultants and most importantly with the trainees in that department may need to be minuted and the minutes agreed before leaving the hospital. Secretarial support from the college will form an important part in assisting this part of the inspection. A minimum level of Audit may need to be prescribed for departments. The hospital application form along with the information gathered on the day should then provide all the information necessary for the inspectors to be able to write their report and recommendations.

At present it is not known how many more NCHDs are going to be employed within the HSE and there exists the possibility of a large increase of consultant numbers. In this context it is not envisaged that there will be any large

changes in the number of training places in the country. However, it is important that each one of these recognised training places provides the appropriate level of training and opportunity to each trainee. The inspection process will be one of the cornerstones of the Colleges role in regulating this aspect of training in Ireland.

Dr. Jeremy Smith

Hospital Inspections Coordinator

The Committee met four times during the year. The main activity of the Credentials Committee is to assess the training of those who have applied to the Medical Council for inclusion on the Register of Medical Specialists. For those who have undergone SpR training under the supervision of the College of Anaesthetists this process is very straightforward. If an applicant has trained abroad or has not completed the SpR training programme in Ireland the process is more complex. The Committee assesses the training undergone as to whether it is equivalent in quality and duration to that provided by SpR training in Ireland. The Credentials Committee then advises the Medical Council as to the inclusion of the applicant on the Register of Medical Specialists. The Medical Council may then accept or reject this advice.

The Credentials Committee must include the totality of an applicants training and experience when considering applications. This must include consideration of all experience both in training posts and in consultant posts, in Ireland and abroad. This requires a very detailed account all experience and training obtained by the applicant both in formal training posts and in consultant / specialist posts. The information supplied by the applicant is then confirmed by writing to the relevant institutions for their report on the training undergone. An outline is obtained of the competencies achieved by the applicant and this is compared to the competencies achieved during SpR training, both clinical and non-clinical. If the application is rejected the applicant is then advised of the deficiencies in their training and how to remedy these deficiencies.

The Credentials Committee also assesses applicants for Full Registration on the Medical Register. The Committee requires 2 years in recognised training posts with satisfactory In Training Assessments and completion of the Initial Competency Test in Anaesthesia. The Committee then awards a Certificate of General Professional Experience, which the applicant forwards, to the Medical Council to achieve Full Registration.

The Chairman of the Credentials Committee attends meetings of the Medical Council Registration Committee. This acts as a point of contact between the Medical Council and the College and enables communication of other issues of mutual concern.

Dr. Rory Dwyer,
Chairman

Dr. Sean McDevitt,
Secretary, Credentials Committee

Irish Board of Intensive Care Medicine

Board members:

Dr. Jeanne Moriarty
Chairperson

Dr. Brian Marsh
Honorary Secretary and ICSI

Dr. Michael Power
ICSI

Dr. Catherine Motherway
COA

Dr. Ken Lowry
COA

Dr. Ted Keelan
RCPI

Dr. Roy Philip
RCPI Faculty of Paediatrics

Mr. Kevin O'Malley
RCSI

Mr. A. E. Wood
RCSI

Dr. Dermot Phelan
(Co-opted) ESICM

Dr. Brendan O'Hare
**(Co-opted) Paediatric Intensive
Care**

Ms. Maria Golden
Administrative Officer

The Board met on three occasions in 2006. A draft document on a joint Faculty of Intensive Care Medicine has been circulated to all parent Colleges for discussion. Meetings have been held with the Presidents of the Royal College of Surgeons in Ireland and the College of Anaesthetists to progress the establishment of a joint Faculty, which in turn will facilitate an application to the Irish Medical Council for specialist recognition for Intensive Care Medicine. These developments remain the prime focus of the current board.

The Examination Committee met on two

occasions. The Diploma examination in Intensive Care Medicine was held in May at St James's Hospital. Dr. Sten Rubertsson acted as extern. A number of candidates for the clinical component of the European Diploma in Intensive Care (EDIC) were facilitated at this exam session. The pass rate for the DIBICM was 70% and 50% for the EDIC. This was a marked improvement on 2005.

Drs. Brian Marsh and Jeanne Moriarty represented the Board at a symposium of international trainers and examiners in Intensive Care Medicine sponsored by the European Society of Intensive Care Medicine in September 2006. This forum explored standardisation of the clinical component of the examination throughout Europe.

The Board conducted the clinical component of EDIC for five candidates in November 2006 at the Mater Hospital. Three candidates passed. Professor Jacques-Andre Romand acted as extern. Both externs commented favourably on the conduct of the examinations.

The Intensive Care Society of Ireland ran the preparatory course for the DIBICM in March 2006.

Dr. Brian Marsh represents Ireland in CoBaTrice. The Board is exploring development of training posts in Intensive Care Medicine with the Postgraduate Medical and Dental Board.

Drs. Marsh and Moriarty represented the Board at a number of meetings with the National Hospitals Office as part of an Intensive Care working group to review ICU resources, training and development. To date no increase in allocation of resources has resulted.

The establishment of the European Board of Intensive Care was noted and the IBICM has sought affiliation with this body.

The Diploma in Pain Medicine examination was hosted by the Mercy University Hospital, Cork in June 2006. Twelve candidates applied and seven were successful. The external examiner was Dr. Beverly Collette from Leicester.

The exam will be hosted one more time in Cork for 2007 and thereafter will be rotated between Dublin, Belfast and Cork.

The Committee has started the groundwork towards a Faculty of Pain Medicine in Ireland. This faculty will undertake training, education, examinations and standards in pain medicine.

Pain Diploma Exam

Masters In Science (Anaesthesia) Report

The Masters in Science (Anaesthesia) was approved by the Royal College of Surgeons (RCSI) and the Senate of the National University of Ireland in November 2002.

The initial target audience included consultants in anaesthesia in Ireland, post fellowship registrars and anaesthetists listed on the Specialist Registrar.

The educational objectives were to enhance the education and professional development of consultants and post fellowship registrars with reference to developments in medical education; and to enhance the quality of patient care by providing participants with specific knowledge and skills relating to the ethics and legal aspects of medical practice. The course duration was for a minimum of two and a maximum of five years, part-time study. The curriculum was designed on a modular, part-time basis consisting of eight taught modules, including Legal Medicine, Critical Events, Applied Anatomy, Basic Principles of Clinical Research, Medical Education 1 and 2, and Biostatistics. Individual modules were available to participants either on site or by distance learning or both.

Enrolment commenced in July 2003 with thirteen graduates conferred in 2005.

The original template for the MSc. envisaged that the number of modules offered would increase over time so that individuals could select those most appropriate to their interests and projected future role as consultants; and that the College might broaden the eligibility criteria to attract other medical professionals or non-medical health care workers. The College has now expanded this programme to facilitate either undertaking the two-year programme and graduating with an MSc., or undertaking individual or combined modules e.g. Biostatistics Module or Medical Education Module. Such structured education will be allocated CME points reflecting the education / learning hours devoted to such a module. Enrolment for the next course will commence in September 2007.

Dr. Eleanor O'Leary
Chairperson, MSc. in Science
(Anaesthesia)

Finance & General Purpose Committee members:

Dr. John Loughrey
Dr. Brian Marsh
Dr. John McAdoo
Dr. Jeanne Moriarty
Dr. Katrina O'Sullivan
Dr. William P Blunnie
Dr. Catherine Motherway
Dr. Henry Frizelle
Dr. Eleanor O'Leary
Dr. Ellen O'Sullivan.

This is my first report as Honorary Treasurer having taken over duties from Dr. Katrina O'Sullivan during the year. The financial base on which the College relies for its activities in relation to Training, Education and Services to Fellows remains secure at the year end 2006. The main income streams, in addition to Fellows' subscriptions, continue to be granted income from the Postgraduate Medical and Dental Board, surplus from College examinations and College meetings. Overall expenditure continues to rise, and the purchase of simulator equipment, which has been successful in both the Primary FCARCSI examination and College courses, was a noteworthy expenditure item this year. However, surplus from income over expenditure this year has resulted in clearing of the mortgage that the College has held on 22 Merrion Square. This is a reflection of the sound financial strategy approved by Council over the past number of years. Our new auditors have recommended that fees income from examinations or courses be attributed to the financial year in which the relevant event takes place and this is reflected in the 2006 report.

There have been no major revisions proposed to fellow subscriptions or examination fees for 2007 despite the expiry of the tenant lease in January. The College has opened a fixed term capital

development fund in advance of seeking donations for the proposed next phase of building at Merrion Square, which will see enhanced on site educational facilities for Fellows and Trainees. The proposed development will require financial support and effort from Fellows and friends of the College and fundraising for this project will be a major focus for the Finance and General Purpose Committee in the near future.

The Finance Committee meets prior to Council meetings at least 5 times per year and is comprised of members of Council as listed above. The Committee is directly responsible to College Council and any elected member of College Council may attend the Finance Committee meetings. The overall strategy is to ensure that income is sufficient to allow the College to fund its activities and develop and expand according to its strategic goals.

A number of staff and professional changes pertinent to Finance occurred in 2006. These included the adoption of a new College Auditor, OCMC, following the Annual General Meeting and also the departure of Maura O'Mahoney as our Accounts Officer in October. We wish Maura best wishes in her future career and thank her for her dedicated service to the College over the years. We are truly fortunate to have appointed Margaret Jenkinson in her place in December 2006 and we will welcome her wholeheartedly onto College staff upon commencement of her post in January 2007.

The summarized accounts are set out at the end of the Annual Report and the full audited accounts are available from the College by e-mail or from the website.

Dr. John Loughrey
Honorary Treasurer and Chairman of the Finance & General Purpose Committee

Auditor's Report

We have audited the financial statements of The College of Anaesthetists R.C.S.I. for the year ended 31st December 2006, which comprise the profit and loss account (statement of financial activities), the balance sheet, the cash flow statement and the related notes. These financial statements have been prepared under the historical cost convention and the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Section 193 of the Companies Act, 1990. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Opinion

In our opinion the financial statements give a true and fair view of the state of the company's affairs as at 31st December 2006 and of its profit for the year then ended and have been properly prepared in accordance with the Companies Acts 1963 to 2006.

We have obtained all the information and explanations we consider necessary for the purposes of our audit. In our opinion, proper books of account have been kept by the company. The financial statements are in agreement with the books of account.

In our opinion the information given in the directors' report is consistent with the financial statements.

The College continues its role in CME by approving credits to educational activities of Fellows.

College CME credits, for educational events such as conferences, meetings, courses and workshops etc. are awarded following submission of a detailed programme in advance of the event. The awarded CME credits can then be advertised with the meeting notices.

The annual requirement of CME credits is available on the College's website www.anaesthesia.ie and also on the website of the Irish Medical Council www.medicalcouncil.ie.

The College provides a CME recording facility for Fellows and audits may be submitted in paper or preferably electronic format via the College's website. The Medical Council may require the College to verify a Fellow's CME activity and may rely on College records to do so.
