Education Calendar 2018 52
This year has been a tremendous year in the life of the College with many projects and programmes maturing and coming to fruition. This year has moved at, what seemed at times, a frenetic pace.

I am drawn to Seamus Heaney’s final poem completed ten days before he died, inspired by the painting ‘Banks of a Canal’ by the French artist Caillebotte:

“Say ‘canal’ and there’s that final vowel
Towing silence with it, slowing time
To a walking pace, a path, a whitewashed gleam
Of dwellings at the skyline. World stands still.”

(Banks of a Canal, Seamus Heaney, 2013)

The imagery is captivating, powerful, almost soporific. In a way, the poet challenges us to slow down and reflect. This is the last year of my Presidency, my caretaker-ship. This provides an opportunity to review highlights and memorable events that took place during this year and during the last three years; then we refocus and look forward as we move on again.

The first Diploma examination in anaesthesia in Ireland was developed as a joint examination of both The Royal College of Physicians of Ireland and The Royal College of Surgeons in Ireland held in 1942. Perhaps a portent of the extended role of anaesthesiologists who are recognised today as the perioperative physicians.

In 1946 the first academic body of anaesthetists was founded by the formation of the Section of Anaesthesia of the Royal Academy of Medicine in Ireland with Dr TPC Kilpatrick, anaesthetist and registrar of the RCPI as President and Prof Tommy Gilmartin as Secretary. At that inaugural meeting, Sir Ivan Magill spoke on ‘Current topics in anaesthesia’.

In 1959 the faculty of Anaesthetists of the Royal College of Surgeons in Ireland was founded. The first or Foundation Dean was Professor Tommy Gilmartin.

The College of Anaesthetists of Ireland was founded as an independent college on Merrion Square in 1998, with the inauguration of Dr William Blunnie as the first President of the College of Anaesthetists of Ireland. I have the honour of being the seventh President.

This year marks the twentieth anniversary of the College’s foundation.

The College awards Memberships and Fellowships in anaesthesia, critical care and pain medicine as well as administering a Master’s Programme and Leadership Courses and Professionalism Programme. Currently we are in the process of preparing an application to become an affiliate College of the National University of Ireland, which will permit us to award our own degrees and diplomas.

“So scholarship and art must be
Fragrant with personality
And moral feeling.
Distinctions not an ego-trip.”

(Seamus Heaney, Verses for a Fordham Commencement, 1982)

The College is completing our specialty document on ethics and professionalism for the Medical Council to reflect the particular contribution from anaesthesia, critical care and pain medicine, covering such topics as advocacy, consent, breaking bad news and end of life issues.

In 2008 the Faculty of Pain Medicine was founded. The College awards both Diplomas and Fellowships in Pain Medicine. The Faculty has commenced the process of accreditation of their training
scheme with the Medical Council.

In 2009 the Joint Faculty of Intensive Care Medicine of Ireland was founded emanating from the Irish Joint Board of Intensive Care that had been examining trainees in the specialty since 1996.

Historically the College of Anaesthetists of Ireland was a constituent College of the Joint Faculty along with the Royal College of Physicians of Ireland and the Royal College of Surgeons in Ireland. This reflects the background specialties of trainees entering the training programme. In order to streamline the governance structures to facilitate IMC accreditation of the training programme in intensive care medicine, the Faculty has now become a faculty of the College of Anaesthetists of Ireland, while still proudly acknowledging its parentage in association with the other Colleges.

It has been recommended by the review team that the accreditation process will soon conclude positively with the opening of the specialist register in intensive care medicine before the current Medical Council merits in May of this year.

In 2009 President Mary McAleese opened the refurbished building including the newly built Dr William Blunnie lecture theatre and the Clinical science education centre in the mews site.

In May 2016 we were delighted, singularly honoured and appreciative to receive notification that we were to the first trainees entering the training programme. In order to streamline the governance structures to facilitate IMC accreditation of the training programme in intensive care medicine, the Faculty has now become a faculty of the College of Anaesthetists of Ireland, while still proudly acknowledging its parentage in association with the other Colleges.

It has been recommended by the review team that the accreditation process will soon conclude positively with the opening of the specialist register in intensive care medicine before the current Medical Council merits in May of this year.

In 2009 President Mary McAleese opened the refurbished building including the newly built Dr William Blunnie lecture theatre and the Clinical science education centre in the mews site.

In May 2016 we were delighted, singularly honoured and appreciative to receive notification that we were to the first training body to be granted Patronage by the President of Ireland, Michael D Higgins, which we proudly but humbly acknowledge on our stationary.

The patronage has been especially noted in our various overseas projects and endeavours.

An Honorary Fellowship is the highest award that the College can bestow and is reserved for those who have made outstanding contributions to anaesthesia, intensive care and pain medicine as well as acknowledging academics and those in leadership positions who act as role models, exemplars and modern day heroes for our postgraduate doctors in training, Members and Fellows of the College.

On September 23rd 1998 President Mary McAleese was awarded the first Honorary Fellowship of the College. This sentinel event may be considered to be the first act of the independent College and thus, the date is considered to be the foundation of the College.

On the 9th of April 2016 we had the unique opportunity to acknowledge and celebrate the achievements and outstanding contributions that Professor William Campbell, Nobel Laureate for physiology/medicine in 2015 had made to the field of medicine by awarding him an Honorary Fellowship of this College.

His lifesaving discovery of Ivermectin – a drug active against parasite roundworms has changed the course of countless lives across the globe.

The Honorary Conferring ceremony took place in Prof Campbell’s hometown of North Andover just outside Boston – a not unnoticed happy coincidence of geography and anaesthesia.

I am delighted to share with you that in May this year our Patron and President of the State, Michael D. Higgins has agreed to be conferred with an Honorary Fellowship of the College at St Patrick’s Hall, Dublin Castle, in the same state apartments where he was inaugurated as President on 11 November 2011 and where then President Mary McAleese welcomed Queen Elizabeth on 18th May 2011. We look forward to this occasion with eager anticipation.

From the first anaesthetic administered in Dublin in 1847, a few weeks after the first anaesthetic was administered in Boston, on the 16th October 1846, the specialty has grown and developed. It has become one of the largest departments in most hospitals.

Twelve per cent of approved hospital consultant posts nationally are in anaesthesia. We are in the process of recording our short but rich history, having commissioned a book on the history of anaesthesia in Ireland and the College.

Anaesthesia plays a pivotal role in the patient’s clinical journey.

The interaction of anaesthetists with patients in the operating theatre being only one point of contact, albeit a highly effective one, as we manage some of the sickest patients including those from the extremes of age, from 500 gram neonates to our most, fragile senior citizens with many comorbidities. Recognition of these patients’ pre-operative condition allows for their stabilisation and optimisation.

Anaesthetists are involved in the management of patients during their clinical journey from the time of consideration of surgery, to and after their discharge home. We lay claim to being peripoperative physicians. It is estimated that through our speciality and subspecialties that we are involved in the management of almost 70 per cent of patients who pass through our hospitals.

Whilst numbers do not reflect complexity, our most recent national audit from the public sector hospitals enumerates that approximately:

- 168,000 General Anaesthetics
- 53,000 Neuroaxial Blocks
- 8,500 Regional Anaesthetics

In total, approximately 230,000 anaesthetics were carried out in 2016.

Following on from the recent NAP5 study into awareness, a further approximately 39% of anaesthetics will have been administered in the private sector.

The physician’s healing hand on the College Crest serves as a reminder that in Ireland all consultant anaesthetists are highly trained specialist physicians.

On the other hand, this situation is not the norm in many countries around the world. According to the Lancet Commission on Global Surgery 5 billion of the world’s population is without access to safe and affordable surgical care and anaesthesia. It is estimated that 143 billion...
additional surgical procedures are needed in the low and middle-income countries each year. The World Federation of Societies of Anaesthesia (WFSA) has a mission to advance the profession ensuring that safe anaesthesia provision and training is led by anaesthesiologists.

Accordingly, the WFSA define anaesthesiology as the medical science and practice of anaesthesia. It includes subspecialty areas of practice such as perioperative medicine, pain medicine, resuscitation, trauma management and intensive care medicine.

The WFSA views the delivery of anaesthesia as a medical practice and an anaesthesiologist as a qualified physician who has completed a nationally recognised medical training programme in anaesthesiology.

In light of the WFSA, European and US use of these terms, and the wider role of the anaesthesiologist, the College is considering the official introduction in Ireland of these terms replacing anaesthesia and anaesthetist with anaesthesiology and anaesthesiologist. The Australian and New Zealand College of Anaesthesia is undergoing a similar process.

Interestingly, most of the Fellows we have discussed this with seem to be in favour of the change, and we were encouraged when Chief Herald did not see any conflict with the name change and our granting of arms. Our next step is to ballot the Fellows. If this is accepted, then it will provide a massive opportunity for rebranding of the speciality and the chance to let the wider public know that anaesthesiologists are indeed perioperative specialists.

Notwithstanding the physical plant of our splendid headquarters building on Merrion Square, the College is actually a vibrant body made up of Fellows, Members and administrative staff with the Executive and Council at its heart.

The functions of the College can be grouped into three robust pillars that support and lend structure to the various activities, the foundation. These pillars are:

1. Training, Education, Innovation and Research
2. Examinations

We currently have a six year seamless training programme with 40 trainees per year. It is likely that this number will need to increase in line with workforce planning.

We are due to undergo reaccreditation of our SAT training programme by the Irish Medical Council this year.

The College, with support from the NDTP office has created 22 special interest year or fellowship posts, to allow further subspecialisation in Ireland as we try to retain, our highly trained doctors in this country.

Most of the clinical education and training takes place in the hospital sites, inspected and approved for training by the College. We watch with interest how the Medical Council will roll out and report on its hospital inspection programme.

The College is committed to continuous professional development and lifelong learning for its Members, Fellows and colleagues and has recently included compliance with PCS as a condition of "good standing".

The high fidelity, award winning, Simulation Department, one of the first in the country, continues to be one of the paragons of the College. It plays an essential role in clinical education and training at all levels and across all disciplines. We are justly proud of the developments of the multidisciplinary crisis management programme taught here in the College. We're just completing development of a second purpose built floor of the clinical sciences building for ICU/ED/Ward scenarios and are grateful to the NDTP for funding our new state of the art mannequins. We have also introduced simulation into College examinations. We look forward to forming new partnerships to expand our reach in this high demand arena.

Workplace based assessments are a key component of medical education and assessment. The College is one of the recognised leaders in this field globally along with Canada and New Zealand. The College is leading out on the development of Entrustable Professional Activities (EPAs) as a means of assessing work based competencies as our trainees develop from novices to experts.

"My father worked with a horse-plough, His shoulders globe like a full sail strung Between the shafts and the furrow.
The horse strained at his clicking tongue.
An expert. He would set the wing And fit the bright steel-pointed sock.
The sod rolled over without breaking."

(Seamus Heaney, Follower, 1996)

We have piloted four EPAs across a range of areas in the specialty. We are now evaluating the process before we invest further in this methodology.

Training is more than acquiring a palette of techniques and skills. Professionalism is a cornerstone of a successful integrated clinical practice. Anaesthetists are recognised as natural multidisciplinary team leaders, moderators and good decision makers. These are skills we encourage and foster in our trainees.

Anaesthesia, Critical Care and Pain Medicine can be challenging and demanding on a daily basis looking after exciting patients and their families; engaging with patients with life limiting conditions can be complex.

It is important that we provide a forum for our trainees and consultants to debrief and reflect on their experiences.

However, the recent Dr Bawa Garba ruling in the UK has raised concerns for trainees and trainers in this jurisdiction as doctors continue to work in some environments that are challenging and less than ideal. To this end, the College Council has organised a ‘hot topics’ session for our trainees to explore the situation together and its implications with informed experts.

It is important that trainees develop resilience to face legitimate challenges, as days can be long, patients and families are demanding. However, resilience must never stop us challenging and changing an adverse or potentially toxic environment.

Seamus Heaney advises,

"Believe that further shore
Is reachable from here
Believe in miracles
And cures and healing wells.
Call miracle self-healing"
The utter, self-revealing

Double take of feeling"

(The Cure at Troy, A Version of Sophocles' Philoctetes, 1991)

We have provided a professional mentor training programme so the College will be in a better position to support our trainees, Fellows and consultant colleagues.

While we are an organisation committed to patient safety, we passionately care about the physical safety of our trainees. Friday, 16th of March, was ‘World Sleep Day’. The RCoA and AAGBI used this to highlight the dangers of fatigue for doctors working long periods then driving home without any sleep. We too acknowledge, on occasion this may happen in this jurisdiction, with potentially disastrous consequences. The College supported the campaign emphasising the safety of ‘those who watch’.

This year the Post-Graduate Diploma course in anaesthesia/recovery for nurses and midwives assisting anaesthetists continued in College in partnership with our colleagues from the Faculty of Nursing in Trinity College and the NCPA.

Research and innovation remains a foundation and catalyst for the continued growth and development of our specialty.

“Imply me, then, didactic muse,
Beyond clichés and pompous views
Of art and science,
To be dulce et utile,
To speak sweetly and usefully
About the world and its’ academy
And their alliance.”

(Seamus Heaney, Verses for a Fordham Commencement, 1982)

This year the College has increased its funding for grants for Ireland based research to €100,000 and I have negotiated and approved by Council, an annual grant from the British Journal of Anaesthesia for £50,000 with matched funding from the College for Collaborative Research.

The College examinations remain one of the pillars of our activity – the Examinations Department continues to flourish, growing in the number of examinations and the number of candidates being processed. We have moved to an online applications system and are reviewing various IT systems to facilitate scoring and analysis. I am very happy to confirm our continued collaboration with RCSI for psychometric analysis and validation of our examinations ensuring that they continue to meet highest international standards. This complements our in house medical educationalists who can provide an immediate analysis of questions and performance at the examinations centres.

“Salus Dum Vigilamus” – safety while we watch. The by-line of our crest and the apothegm of our practice. Safety and standards is the third pillar of our College foundations.

The words of Shakespeare’s Hamlet come to mind:

“To die, to sleep
To sleep, perchance to dream
ay, there’s the rub, for in this sleep of death
what dreams may come…”

It is our charge, our duty, to ensure the best outcomes so anaesthesia is a sleep of dreams rather than the alternative.

Patient and personnel safety is everyone’s responsibility. Safety initiatives home and focus these ideals. Advances in monitoring and equipment have in no small way contributed to this arena in both the operating room and in intensive care. But no matter how good the equipment, the anaesthetist or anaesthesiologist is the lynchpin, matter how good the equipment, the anaesthesiologist is the lynchpin, and any malfunction or drug alerts. They are one function this will serve is a forum to report unexpected events, equipment malfunction or drug alerts. They are attended by the incoming President of the WFSA. This meeting was a resounding success and will become an annual event.

The Quality and Safety Committee have established a National Safety Network with a named representative in each Department of Anaesthesia in each hospital in the country. One function this will serve is a forum to report unexpected events, equipment malfunction or drug alerts. They are working with the NCPA, the Irish Standing Committee and the AAGBI to achieve maximum compliance with anaesthesia record keeping standards as well on-going engagement with the HSE Quality Assurance and Verification Division in relation to Serious Reportable Events (SRE) (IE).

The College has contributed to the NCPA model of care for anaesthesia. The proposals included, especially the so-called “2 plus 2” cover arrangement to improve the care of obstetric patients will have implications on workforce planning for both trainee and consultant numbers, both of which will need to increase.

We are represented on the UK’s Safe Anaesthesia Liaison Group (SALG).

A regular newsletter, safety warnings, advisory notes and updates are placed in the safety section of our College website. Launched in 2016, the College was the first training body internationally to sign up to the WSFAs safety consortium Safe Anaesthesia for Everybody – Today (Safe-T), promoting international standards for the safe practice of anaesthesia worldwide.

As part of our on-going strategic plan we have set up a College risk register to identify and mitigate risk and liability.

One of the attributes of a vibrant, responsive contemporary body is change. This of itself can be challenging, but also presents new opportunities. This year, we have continued the restructuring of the administrative support team in the College with the appointments of Mr Martin McCormack who joined us as CEO from the RCPI in August, Ms Margaret Jenkins as COO and Finance Officer, Dr Camillus Power as interim Director of Training along with Ann Kilemade and Jennie Shiel.
in the Training Department and Mr Ben Courtney in the Finance Department. To each we extend a warm welcome, assured that they will work with the Council and Committees, trainees and Fellows as we move forwards together in an open, robust partnership.

Whilst the demands of change can be exacting, they present us with the possibility to assess where we are and our needs going forward.

The poet confronts us to "walk on air against your better judgement" (Seamus Heaney, The Gravel Walks, 1995)

As part of our overarching appraisal, we are in the process of a governance review of the College as part of our College’s commitment to "good governance". Many of our Articles of Association and Memoranda have their origins from the foundation of the Faculty of Anaesthetists, RCSI in 1959 and the foundation of the College in 2008. However, we now function and operate in very different times with different expectations, regulation and accountability.

The College is also in the process of consolidating its strategic plan for the next 3 years. This will provide stability and unity of vision as we move forwards, based on our three foundation pillars.

This year, we have had two very successful meetings of our newly formed Senior Fellow’s Forum. We were delighted to welcome the participants back to their College. We also plan to organise a Senate meeting of the President and past Presidents of the College on an annual basis.

Another endorsement of our innovative and dynamic organisation is looking outside and developing partnerships both at home and overseas. We look forward to growing and developing our areas of co-operation.

We were honoured to host a visit from Marie Heaney in March to the College. She was delighted to see how the anaesthesia community was being introduced to Seamus’ work!

We have actively engaged with The Forum of Irish Postgraduate Medical Training Bodies as well as with the Medical Council during this year.

Our partnerships and endeavours away from home, nurturing the positive facets of globalization, make Merrion Square a categorical headquarters - the hub of our activities. Our overseas examination centres are currently in Perdana and Penang in Malaysia, Oman, Bahrain, Jordan and Egypt.

Following meetings in Hong Kong at The World Federation of Societies of Anaesthesiologists meeting in 2016 and visits to the flagship Peking University Hospital College and Medical Centre – home of the anthropological wonder, ‘Peking Man’, we officially met the President and executives from the Chinese Society of Anaesthesiologists in Guangzhou in August. This culminated in the signing of an MOU between CAI and the Chinese Society of Anaesthesiologists CSA/Chinese Medical Association to develop areas of cooperation and collaboration between the two organisations at an event hosted by His Excellency Ambassador O’Leary in the Irish Embassy in Beijing on the 7th of February this year. This is particularly timely as the Chinese anaesthesia training is undergoing revision with the formation of a College of Anaesthetists and introduction of a national curriculum.

This was a very auspicious and special day that marks a milestone in the relationship between the CAI and the CSA and CMA and thus with China itself. The significance of the event can be contextualised perfectly against the backdrop of the Silk Road Economic Belt and the 21st Century Maritime Silk Road, the so-called ‘Belt & Road’ initiatives first launched by President Xi Jinping in 2013.

As Liu an, one of the greatest authors of the Han dynasty wrote, ‘a broad mind can embrace diverse people’. This aspiration unites us in a unique branch of medicine that is still evolving. It is against this background that we are introducing our examinations into China. Already our Chinese website and app are complete and the first exams will take place this year.

Our other flagship programme overseas is in Malaysia. In April 2016 we signed an MOU with the College of Anaesthesiologists, Academy of Medicine of Malaysia to partner a Ministry of Health parallel, competency based, specialist training programme to address the chronic, severe shortage of specialist trained anaesthetists in the country. The programme mirrors the universities’ Master’s Programme in anaesthesia. The parallel programme enshrines the CAI Membership and Fellowship exams into the curriculum.

We have inspected and accredited seven hospitals in the both the Peninsula and Eastern Malaysia for training.

The College has undertaken a train the trainers and train the examiners courses as well as advising on curriculum development. These courses help underscore the importance and consequences of high stakes medical exams as well as the behind the scenes work that ensures reliability and validity of the College examinations.

This programme has been endorsed by the Minister for Health and by the Director General who will officiate at the forthcoming hospital accreditation award ceremony.

In Malaysia we are also exploring ways of extending our involvement with Penang Medical College that is a joint venture of UCD and RCSI as it receives its enhanced status of a branch Campus University.

Our partnership with the Oman Medical Specialist Board (OMSB) continues. Last year five fellows graduated from the two-year International Fellowship Programmes. Recently our Examinations Department held the membership OSCE in Oman.

In August a small group of us attended the first National Society of Anaesthesiologists meeting in Malawi. In many ways this was a testament to the support, work and
investment as well as the vision of previous Presidents of this College to help develop anaesthesia in Malawi against a backdrop of the second highest maternal mortality rate in the world by training both medical officers and four Master of Medicine post graduate students.

College support for such overseas projects continues. This year, amongst others, we have sponsored two WFSA Fellowships and pursue our engagement with CA-NESCA (College of Anaesthetists of East, Southern and Central Africa).

On a diametrically different point, we continue our very fruitful participation in the Tri-Nations (Anaesthesia) Common Issues Group between ourselves, the Royal College of Anaesthetists and the Australian and New Zealand College of Anaesthetists. This is an opportunity to meet quarterly and discuss issues affecting anaesthesia at a global level – it is amazing to see how similar issues are common to all three Colleges and the influence we may bring to bear globally, for example on world-wide drug shortages.

With the building, transformation has not been limited to its personnel, but also remodelling of the building and relocation of some of the departments within the College. In December, the newly renovated lecture theatre was reopened with a ribbon cutting ceremony after Dr William Blunnie the first President and whom the theatre is named after.

The Training Department has been relocated to the 2nd floor of the clinical science and training building. The stylish office space gives a sense of corporate identity to the department. The Examinations Department has moved to the top floor of Merrion Square, which will enhance security around the examinations. The Finance Department has also relocated to the top floor. In addition, we are completing development of a new floor for high fidelity simulation in the training building.

The first event in the renamed Dr William Blunnie lecture was the 2017 Gilmarin Lecture ‘Who Needs Art’ delivered by Prof Barbara Dawson, Director of Dublin City Gallery, The Hugh Lane. I think there are a number of enigmas as we look forward. Funding is limited. This year we have more patients, both elderly and children, on trolleys than ever before, despite the promise of cash injections recently. The exciting publication the Säinte-care Report in May 2017 on the future of healthcare in Ireland has fallen behind in its implementation programme. We are at risk of ‘reform fatigue’ and yet ‘health inequalities’ prevails.

Recruitment across all specialties is challenging, we are able to progress fewer consultant posts and their take up is slow – more often, not for financial reasons but for lifestyle choices and working conditions.

Not only do we have an aging population, but also an aging workforce in anaesthesia and allied specialties. According to the Medical Council "Medical Workforce Intelligence" Report 2016, over a quarter of consultant anaesthetists are aged 55 years and over.

In other jurisdictions those over 55 years of age no longer take part in the on call rota. As one advances in years it takes longer to recover from interrupted sleep or nights without sleep. Perhaps considering a move to portfolio careers with reduced on-call without sleep. Perhaps considering a move to portfolio careers with reduced on-call

Inability to employ suitably qualified nurses has resulted in closed operating rooms and ICU beds leading to longer waiting lists which impact on patient care.

The exciting publication the Säinte-care Report in May 2017 on the future of healthcare in Ireland has fallen behind in its implementation programme. We are at risk of ‘reform fatigue’ and yet ‘health inequalities’ prevails.

Recruitment across all specialties is challenging, we are able to progress fewer consultant posts and their take up is slow – more often, not for financial reasons but for lifestyle choices and working conditions.

Not only do we have an aging population, but also an aging workforce in anaesthesia and allied specialties. According to the Medical Council "Medical Workforce Intelligence" Report 2016, over a quarter of consultant anaesthetists are aged 55 years and over.

In other jurisdictions those over 55 years of age no longer take part in the on call rota. As one advances in years it takes longer to recover from interrupted sleep or nights without sleep. Perhaps considering a move to portfolio careers with reduced on-call may be the way forward so senior, experienced consultant anaesthetists can remain productive members of the perioperative team. This may be challenging for smaller departments.

Being released from clinical commitments for College activities, for example, for examinations, training events and executive roles, is becoming more difficult and challenging as the workload and clinical demands in the hospitals is compelling.

Notwithstanding, I do think the future is buoyant for anaesthesia and its related specialties as well as for the College as witnessed by the large numbers of young enthusiastic doctors applying for our training scheme and the demand for our trainees who have completed our specialist training programme.

I would like to extend my thanks to each of my colleagues on the Council and administrative staff, especially Mr Martin McCormack and Ms Margaret Jenkinson for their unfailing help, support and wise counsel throughout the year.

I hope that in my time as President of the College of Anaesthetists of Ireland, a very special institution, that together we have been able to create

"An oratorio…
Energy, balance, outbreak…
At play for their own sake”
(Seamus Heaney, In Time, 2013)

As I conclude my final annual report, I can affirm with confidence that anaesthesia, intensive care and pain medicine are exciting, fulfilling career choices: the future is bright as we focus on our patients, trainees and colleagues. The College is secure, buttressed by its three robust foundation pillars and its Fellows as it goes forward.

Professor Kevin Carson,
President
The past year has been a time of change for the College but our core purpose remains the same – to protect lives and promote the health of the patients we serve. It is at the heart of everything we do, across all our pillars of activity and was a significant motivating factor when I decided to join the College.

It was a great honour to be appointed as CEO this year, it is an opportunity that I relish. My immediate priorities are to protect, sustain and grow College activity nationally and internationally.

Abraham Flexner once said that “Medical education is not just a program for building knowledge and skills in its recipients, it is also an experience which creates attitudes and expectations.” This year we continued to develop and innovate our training programmes, examinations, continuous professional development, quality and patient safety and research activity to maintain our position as an international standard bearer for world-class practice of anaesthesia, perioperative, intensive care and pain medicine.

Our core Specialist Anaesthesia Training (SAT) programme contains formative and summative assessments aligned to a curriculum that assesses patient safety, integrity, teamwork, communication and leadership as well as clinical skills, manual dexterity, proficiency, practice and refinement.

In September, we launched our Entrustable Professional Activities (EPAs) in vascular access, managing pain in labour, paediatric anaesthesia, and general anaesthesia to trainees in year one of the SAT programme. This is a significant change management programme and we have created a repository of support material in our online hub, enabled the use of the feedback reports via mobile-app technology and developed an engagement strategy with our Tutors, Fellows and Trainees. It is great to see this project moving from a development to implementation stage and we will continue to review and measure progress.

Throughout 2017 the College inspected and supported clinical site rotations in twenty-one sites across Ulster, Munster, Connaught and Leinster; and continued to develop our structured modules and mandatory education courses and quality assure our membership and fellowship examinations.

All this work is supported by our College Council Fellows and we are indebted to the clinicians involved for their dedication and endeavours on behalf of the College and the specialty. We will continue to impress upon government the need to work with us to support clinicians who devote time to College activities.

Our CEPD Congress Committee continues to develop education, training and continuing professional support for our Fellows with a wide and varied portfolio of lectures, workshops, courses and an outstanding annual congress and education calendar.

The College of Anaesthetists of Ireland Simulation Training (CAST) programme provides systematic training to our trainees and continuing medical education and development to practitioners in anaesthesia through experiential learning and directed self-reflection in a clinical skills and simulation environment. This year the College has significantly invested in the upgrade and development of our high-fidelity simulation training programme, opening up exciting new opportunities for the future.

I am pleased to report that during my first year as Chief Executive, the College's finances have remained strong. This has enabled investment back into our core activities in Ireland and overseas.

As part of our strategic plan, College Council have agreed to increase the annual CAI research project grant to €100,000, demonstrating commitment to research and innovation here in Ireland. Our Research, Audit and Innovation committee awarded this year's grant to two excellent applicants. Internationally, Council have also agreed to fund World Federation of Societies of Anaesthesiologists Fellowship programmes in Ghana and Cairo and to match collaborative research grant funding of €50,000 with our official academic journal partner BJA to support research in our specialties across Ireland and the UK.

International Strategy

The global burden of disease amenable to surgical intervention is substantial and growing. Despite this, there are
gross disparities in access to safe surgical and anaesthesia care worldwide. As part of a properly functioning health system all people should have access to safe, high-quality surgical and anaesthesia care with financial protection when needed. We continue to collaborate with our strategic partners to build on our international commitments to help reach this goal.

From Johor Bahru at the tip of the Malay Peninsula to Zhengzhou in East Hanan province and from the Great Rift Valley in Malawi to Muscat on the Persian Gulf, the College is actively engaged in improving access to quality anaesthesia care and meeting the shortfall in skilled anaesthetists in those countries through collaboration and consultation on examinations, training programme structure and content, clinical skills workshops and international clinical fellowship programmes.

Good Corporate Governance
The College is committed to good corporate governance, which strengthens Council and management accountability and helps build public trust in the College. The Council has adopted a corporate governance framework for the effective governance of the College. The framework addresses matters such as the commencement of a strategic planning process, building on Council’s mission and vision, the introduction of an annual work programme and calendar for Council, the introduction of a risk management system for the College, a review of College committee structure and annual evaluation of council and committee effectiveness, the development of annual business plans and key measures of success outcomes alongside a code of conduct for Council & Committee Members.

The strategic planning process began in October 2017 and will be published and launched in 2018, reflecting the values of the College, our strategic goals, the key areas of activity on which we will focus and it will define the criteria for achieving success. The strategic plan will endure over time and will guide the annual business planning process.

College Council has established a corporate governance working-group, which regularly reviews developments in corporate governance and updates the corporate governance framework and other governance materials, as it deems necessary and appropriate.

Quality and Patient Safety
Given that patient safety is at the heart of everything we do, it was very satisfying to see the range and depth of research and thought provoking presentations at our Inaugural National Patient Safety in Anaesthesia Conference in November, which we streamed live to Fellows, Trainees and Members across the globe. This will now become an annual event in the College calendar.

I also commend the CAI Quality and Safety Advisory Committee for establishing a National Anaesthesia Safety Network. The QSA committee work closely with the Irish Standing Committee of AAGBI and the National Clinical Programme for Anaesthesia to communicate patient safety information in a structured and systematic way.

Key Stakeholder Engagement
The theme of patient safety extends to our continued engagement with our regulator, the Medical Council. The College has reflected on the first five years of operation of the Professional Competence Schemes under contract with the Medical Council. In October 2017, the Medical Council together with the Forum of Postgraduate Medical Training Bodies hosted a Symposium to ‘Address the Challenge of Compliance in the Maintenance of Professional Competence’. A number of key opportunities were broadly defined on how to facilitate and manage maintenance of professional competence compliance, especially emphasising the need to move away from considering professional competence as a box ticking exercise and engage in more meaningful lifelong learning. The Medical Council have extended the PCS contract with the College of Anaesthetists of Ireland for a further three-year period.

The College and JJICMI also engaged with the Medical Council and the Health Service Executive to seek accreditation of the intensive care medicine higher specialist-training programme. Having received support from the National Doctors Training and Planning unit and the Clinical Director of Acute Hospital services, we proceeded to make full sub-
CEO’S REPORT

The College have collaborated with HSE National Clinical Programme for Anaesthesia (NCPA) in the development of a Model of Care for Anaesthesia and with the Critical Care Programme (CCP) supporting the implementation of a Model of Care for Adult Critical Care.

mission the Medical Council’s Education, Training and Professional Development Committee in December 2017, which will be assessed and considered in 2018. The Medical Council published its updated Guide to Professional Conduct and Ethics (8th Edition) on (17th May 2016). The College of Anaesthetists of Ireland have drafted an adjunct to that guide, to provide more sub-specialty level of detail on professionalism in Anaesthesia, Intensive Care and Pain Management and will publish the document in 2018. The Medical Council of Ireland’s expectation is that the quality of the doctor’s competence, behaviours and relationships that underlie this professionalism is maintained in the patient-doctor relationship.

Alongside the Medical Council, we continue to engage with the Forum of Postgraduate Training Bodies and the HSE National Doctors Training and Planning unit on a variety of issues relating to training and the profession. In November 2017 the College signed up to the Principles of Flexible Training in recognition of the need to support more flexible and differentiated approaches during training that take account of family, research or other constraints.

The President and I continue to advocate with the Forum and the HSE NDTP for alignment of strategy in relation to postgraduate training, to increase the level of funding in medical training, to develop meaningful recruitment and retention strategies and to support health and well-being of doctors. The College is committed to working with the Medical Council and the HSE to develop a strategy to support the increasing number of NCHDs not in training and to review the educational supports, appraisal and assessment available to them.

The College had a significant presence at the national Medical Careers Day in September in Dublin Castle, where over 500 students had the opportunity to meet specialist clinicians and staff from our College to learn more about SAT training, which remains the most competitive specialty training programme nationally.

The College have collaborated with HSE National Clinical Programme for Anaesthesia (NCPA) in the development of a Model of Care for Anaesthesia and with the Critical Care Programme (CCP) supporting the implementation of a Model of Care for Adult Critical Care.

Our Heritage
The CAI has approximately 130 Senior Fellows, who are retired from clinical practice, who have demonstrated sustained achievements in anaesthesia, intensive care or pain medicine and have contributed to the science or practice of anaesthesia and to development of the College. This year the College hosted an inaugural event especially for this group of members under the chairmanship of Prof Dennis Moriarty and such was the level of positive feedback that we will aim to host three Senior Fellows Forum events per annum.

Acknowledgements
The College is well served by a highly committed group of talented staff whose contribution is very much appreciated. In October Dr Cathy Armstrong retired from her position as Director of Training, having given outstanding commitment to the College, our trainees, tutors and Fellows and the broader development of the SAT training programme and the CAI Mentoring programme over her tenure. Dr Camillus Power was appointed as Interim Director of Training and Dr Brian O’Brien took up his new role as Chair of the Training Committee. I look forward to working with them and I would also like to thank Mr Fintan Foy, Mr Mark Mc Donnell and Ms Maria Golden, who departed during the year, for the contribution they made to the College. We wish them well in their new endeavours.

I would like to acknowledge the contribution of Council, Committee members, examiners, tutors and trainers for their commitment and support. Without you, we would not have a College. I would also like to thank the staff of the College for their hard work and dedication in supporting the activities of the College. In particular, I recognise the support and contribution of Ms Margaret Jenkinson, Chief Operations Officer. As Jean Paul Sartre once said, “commitment is an act, not a word” and Ms Jenkinson is a huge source of support in the day to day running of the College.

Finally, I would like to thank our President, Professor Kevin Carson for his leadership on Council during the time that we worked together. The President’s determination and an unrelenting commitment to excellence have enabled us to attain success and envision a bright future for the College.

Martin McCormack,
CEO
I am pleased to present our Financial Statements and my report for the financial year ended 31st December 2017. Our financial strategy employs disciplined financial stewardship to ensure the long-term sustainability of our operations and the realisation of the growth ambitions of the College. We place a strong focus on generating a surplus annually to ensure that our on-going commitments can be met. As a registered charity, all surpluses are reinvested for the furtherance of training, education and research.

In 2017 the College undertook a governance review that will continue into the early part of 2018. A key recommendation from the review was the necessity for a risk register. The Finance Committee will be responsible for assisting Council by taking delegated responsibility for the identification and assessment of risks and for reporting on same, as well as for reviewing the College’s risk management and internal control systems and making recommendations to Council.

I am delighted to be able to report on another year of solid progress for the College and on the healthy state of the College finances. The College continues to have no need for borrowings and is able to rely fully on operating surpluses. During 2017 we invested €900,000 with Merrion Capital. The College’s investment policy is to maintain a balance between income and capital growth with medium risk and an ethical stipulation that there should be no direct investment in tobacco related companies. The total return for the year compares satisfactorily with other types of investments of a similar risk profile. These investment funds will assist the on-going financial sustainability of the College, as well as funding cutting edge research in the fields of anaesthesia, pain medicine and perioperative medicine.

Grant Thornton audited our accounts. We have received a clean, unqualified audit opinion, which means that the financial statements present a true and fair view of the financial position.
of the College and have been properly prepared in accordance with relevant legislation. No concerns or comments were expressed. The Financial Statements of the College for the year ended 31st December 2017 are set out on pages 12-18 of this annual report.

**Income & Expenditure Account**

In summary, in 2017 there is a continuance of the sound financial performance and position of the College. Total income of the College for the financial year ended 31st December 2017 was €3,590,854 which represents a 7.5% increase on the total income for 2016. The majority of income continues to be earned from those activities that are core to the College’s strategy.

HSE funding remains our largest single source of income, accounting for 52% of total income. While income for Annual Subscriptions has fallen slightly in 2017 it should be noted that 2016 was an exceptional year for subscription income. Furthermore, we have had significant uptake from our UK Fellows in relation to our reduced subscription for dual membership. Total expenditure for the year was €3,224,268 which represents an increase of 7.2% on 2016 expenditure. Overall, a strong surplus of €370,784 was generated on ordinary activities – a 9.6% increase on the 2016 figure. The College’s financial results for the year were in line with expectations.

**Statement of Financial Position**

The statement of financial position as at 31st December 2017 details the assets and liabilities of the College and I am delighted to report that the net assets now total €8,778,285. This is an increase of 4.4% on the 2016 net assets. Debtors at 31st December 2017 were €756,923. The majority of this balance relates to HSE invoices. Creditors at 31st December 2017 were €664,366.

In 2017 the College continued to focus on investing in new and existing technology to improve services to Fellows and trainees. For 2018 we will focus on projects aimed at delivering a more sustainable organisation, with the College progressing the move to an “Infrastructure as a service” hosted model in relation to its information technology strategy.

For 2018 we will focus on projects aimed at delivering a more sustainable organisation, with the College progressing the move to an “Infrastructure as a service” hosted model in relation to its information technology strategy.

Finally, I gratefully acknowledge the support of the loyal and hardworking members of the Finance committee for their contributions and on-going financial stewardship, thereby ensuring the on-going success of the College. I would also like to express my sincere gratitude to the staff in the Finance office, Ms Margaret Jenkinson our Finance Officer and her team – Mr Ben Courtney who joined the department in January 2018 and Ms Natalie Brennan. We look forward to another exciting year ahead.

Dr Kevin Clarkson,
Honorary Treasurer and Chair of the Finance & General Purpose Committee

On behalf of the Board of Directors
Prof Kevin Carson
Dr Kevin Clarkson
Auditor’s Report to the Members of College of Anaesthetists of Ireland CLG

Opinion
We have audited the financial statements of College of Anaesthetists of Ireland CLG, which comprise the Statement of Comprehensive Income, the Statement of Financial Position, the Statement of Cash Flows, the Statement of Changes in Equity for the financial year ended 31 December 2017, and the related notes to the financial statements.

The financial reporting framework that has been applied in their preparation of the financial statements is Irish law and accounting standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland". (Generally Accepted Accounting Practice in Ireland).

In our opinion, College of Anaesthetists of Ireland CLG’s financial statements:

- give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland of the assets, liabilities and financial position of the Company as at 31 December 2017 and of its financial performance and cash flows for the financial year then ended; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the Companies (Accounting) Act 2017.

Basis for Opinion
We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the ‘responsibilities of the auditor for the audit of the financial statements’ section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of financial statements in Ireland, namely the Irish Auditing and Accounting Supervisory Authority (IAASA) Ethical Standard concerning the integrity, objectivity and independence of the auditor, and the ethical pronouncements established by Chartered Accountants Ireland, applied as determined to be appropriate in the circumstances for the entity. We have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions Relating to Going Concern
We have nothing to report in respect of the following matters in relation to which the ISAs (Ireland) require us to report to you where:

- the directors’ use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company’s ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

Other Information
Other information comprises information included in the Annual Report, other than the financial statements and our auditor’s report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies in the financial statements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we are required to report by the Companies Act 2014 and the Companies (Accounting) Act 2017

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the Directors’ Report is consistent with the financial statements. Based solely on the work undertaken in the course
of our audit, in our opinion, the Directors' Report has been prepared in accordance with the requirements of the Companies Act 2014 and the Companies (Accounting) Act 2017.

Matters on which we are required to report by exception

- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Directors' Report.
- Under the Companies Act 2014 and Companies (Accounting) Act 2017, we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of the Acts have not been made. We have no exceptions to report arising from this responsibility.

Responsibilities of the management and those charged with governance for the financial statements

As explained more fully in the directors' responsibilities statement, management is responsible for the preparation of the financial statements which give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland, including FRS102, and for such internal control as they determine necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

[SH1] Responsibilities of the auditor for the audit of the financial statements

The auditor's objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs (Ireland), the auditor will exercise professional judgment and maintain professional scepticism throughout the audit. They will also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion of the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If they conclude that a material uncertainty exists, they are required to draw attention in the auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify their opinion. Their conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- The Auditor shall communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that may be identified during the audit.

[SH1] The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose.

To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

The committee met four times over the year and dealt with a broad variety of issues pertaining to the overall running of the scheme, and an equal range of matters pertaining to individual trainees. The major topics we have spent time on include the SAT recruitment process, the roll out of EPAs (Entrustable Professional Activities) as a smartphone-assisted form of clinical teaching, and a sweeping effort to reform the allocation of trainees on the SAT matrix so as to maximise the quality of training, the transparency and the fairness of the system. Ideally we wish to minimise the disruption of personal lives, while providing a predictable supply of high calibre doctors to our training hospitals. Frequently these objectives are difficult to reconcile, and the necessary trade-offs and compromises make up the substance of much of our discussions.

SAT recruitment is in a very positive state, with more than two applicants for every training post. We recruited 40 newcomers to the programme at interviews in January, they being selected from over 60 shortlisted. The interviews are intended to be objective, with structured questions, and points awarded for specific achievements on one’s CV. The time afforded to us by consultants to conduct these interviews is greatly appreciated; indeed it underpins the credibility of the programme from its earliest stages. We thank them for their input. The application form and interview process were changed in summer of 2017, and most involved found the new format better. Further modifications are presently under consideration, but are likely to be relatively minor. We aim to commence a formal process of data collection on the learning process and progression of the 2018 intake, which may lead to the publication of a research. Ultimately this should provide an evidence-base for the on-going evolution of the programme.

The matrix of training posts is a complex chart, covering the six-year programme of 40 doctors. Each sequence needs to include paediatric experience, obstetric care and a broad range of other specialties. We try to schedule each trainee to work in only two geographical locations, one of which is necessarily Dublin. Requests to swap, and the existence of Special Interest Years (SIYs), disrupt the pattern, and inevitably have knock-on effects. These are important options however, and justify themselves as they improve trainees’ levels of satisfaction and their experience of the programme generally. Nonetheless, we are trying to improve adherence to the prescribed programme, and to establish mechanisms and guidelines for posts being swapped, and we may look to move the SIYs to an earlier point in training. Many appear to agree that the last year is best conducted as an undifferentiated, high-level anaesthesia post in which one is expected to function close to consultant level, in a broad diversity of operating environments. Moving the SIY option to year 4/5 is a way to encourage this. Reorganising this flowchart – which covers a six-year programme for 40 people – or 240 years of working life – has been a Herculean task for college staff. Ann Kilemade and Dr Camillus Power have been major contributors to this process.

The rollout of EPAs in the second half of 2017 was a major change in the training programme, the full effects of which are not as yet apparent. The trial period for the project began in October, and full implementation for SAT 1/2 trainees begins in July 2018. In essence, this process will put clinical and theatre-based teaching on a formal, quantifiable basis. It begins a process of evolution away from time-based apprenticeships toward observed demonstrations of procedural and other competencies in the hospital setting. Acquisition of each defined skill is documented up to a point where one is deemed fully competent, and can thereafter be “entrusted” with that task. It remains an ambitious venture.

Training days for tutors and instruction videos were provided after a two-year project to choose and define the skills and competencies, develop the relevant app, and begin to troubleshoot it. It is now on the App Store and uptake has been strong, with useful and positive feedback to trainees and to the College continuing. More information on this is available from the CAI website, and elsewhere. Although the term
is perhaps overused, this is a genuine paradigm shift in clinical teaching. At this stage it's limited to four clinical interventions but the project will expand to cover many more. It has required significant planning and investment of resources at Council level. The EPA concept will be a major component of the SAT programme as experienced by trainees in the future.

The terms of reference of the committee were also reviewed during the year. In certain respects, this type of appraisal needs to be done regularly – items referred to become obsolete, and sometimes new scenarios arise that warrant specific rules to be added. The current draft appears more reflective of current training realities, and we will endeavour to maintain that standard.

A major contribution made by tutors in our 25 training hospitals must be acknowledged. The names of all tutors are listed at the end of this report. This year saw Dr Patricija Ecimovic complete her term as lead tutor, and we wish to thank her as well as all other tutors for their work, and wish Dr Ecimovic the best in the future.

With regard to the problems that are raised by individual trainees, it may be wiser to avoid giving examples or listing scenarios. Suffice to say that as a full year passes for our 240 or so doctors in training, clearly this can be seen to encompass three human lifetimes of experiences. Difficulties arise, and in some cases they are very complex and challenging. Some relate to work, but many do not. We try to be of assistance, and to mitigate problems as best we can. We are frequently frustrated that we cannot do more, however, and unfortunately this is unlikely to change despite any efforts we make. The CAT group contributes significantly in many ways to the committee, not least in helping individuals to bring problems to our attention. Their valuable contribution is crucial to the committee, and we are very thankful for it.

Dr Brian O’Brien,
Chair of the Training and Education Committee

Suffice to say that as a full year passes for our 240 or so doctors in training, clearly this can be seen to encompass three human lifetimes of experiences. Difficulties arise, and in some cases they are very complex and challenging. Some relate to work, but many do not. We try to be of assistance, and to mitigate problems as best we can.
During the year, additional Tutors were appointed with specific responsibility for the implementation of EPAs for the SAT 1 trainees. All our Tutors have played a significant role in the past year and are deserving of our gratitude. A current list of Tutors nationally is provided below.

The committee met in February, May, September and November 2017.

**College Research Grant 2017**

There were seven applicants for the College Research Grant which was awarded to Dr Fennessy and Professor McCaul (€25,000) for their project, "Creation and validation of anatomically correct cricothyroidotomy models for training by 3D printing" and Drs Royds and McCrory (€50,000) "Identification and classification of the peptide and cellular constituents of CSF in patients with chronic neuropathic pain". The submissions were of excellent calibre.

The College Research Grant was increased to €100,000 for 2018. In addition, the College is collaborating with the British Journal of Anaesthesia in a joint research grant of £100,000.

**SATARN**

CAT has established a trainee research and audit network, which was endorsed by the committee. The committee continues to support applications from trainees and Fellows who wish to undertake surveys and clinical audit. Training will be required in relation to the new data protection regulations.

**Dr Jeanne Moriarty,**  
*Chair of the Research Audit and Innovation Committee*
In October 2017 Dr Cathy Armstrong retired as Director of Postgraduate Training and as a result, I vacated my Chair of Training Role to take up the position of Interim Director of Postgraduate Training for six-eight months. I’d like to take the opportunity to acknowledge the fine work and dedication of Cathy on behalf of the trainees, trainers and the College. The Chair of Training and Education role passed to Dr Brian O’Brien and I wish him well in this important role on behalf of Council.

A number of changes had taken place in the Training Department with the appointment of a new Training Officer and new staff. In that context, it seemed appropriate to undertake a review of the operation of the Training Department, including an in-depth review of Rotations to ensure greater fairness and transparency, Training Regulations and general Policies and Procedures. In addition, the EPA Project had reached an important milestone, whereby it was time for a transition from theory into practice. This

We also wish to acknowledge the sad untimely passing of Dr Mark Owens, who was an excellent trainee and a very talented and dedicated doctor. Dr Owens was a member of the CAT Committee and as a tribute to his remarkable dedication, we are delighted to include the picture above to acknowledge his very fine work on behalf of the next generation of trainees.
resulted in placing four core EPAs and four feedback reports at the disposal of trainees and tutors in all our training hospitals. This included a decision to launch the App, a Digital Resources Hub and the training of 25 EPA tutors. All of this was to allow practical experience of this project to inform Council’s decision (in April 2018) on how best to develop competency based medical education for our training programme going forward.

We present the work of the Training Department in the format of a table, opposite, to better illustrate the work achieved to date and the scope of activities managed by the Training Department. Hopefully, this captures the sense of change, dynamism and enthusiasm within the new Training Department.

I wish to acknowledge the sterling work of our new Training Officer and Training Manager who have had to hit the ground running on a very steep learning curve, with excellent support from a largely new team, many of whom had to take on new responsibilities to support the wide range of interconnecting College activities, ranging from recruitment, allocation of trainees, simulation to Faculty and committee support so that the trainee receives the best possible chance to progress through their training and achieve their CSCST. It is also important to acknowledge the input of CAT to the work of the Training Department.

### TRAINING DEPARTMENT

The current composition of the Training Department and roles are outlined below:

<table>
<thead>
<tr>
<th>NAME</th>
<th>ROLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dr Camillus Power</td>
<td>Interim Director of Training</td>
</tr>
<tr>
<td>Dr Eilis Condon</td>
<td>Deputy Director of Training</td>
</tr>
<tr>

</tbody>
</table>

We present the work of the Training Department in the format of a table, opposite, to better illustrate the work achieved to date and the scope of activities managed by the Training Department. Hopefully, this captures the sense of change, dynamism and enthusiasm within the new Training Department.

I wish to acknowledge the sterling work of our new Training Officer and Training Manager who have had to hit the ground running on a very steep learning curve, with excellent support from a largely new team, many of whom had to take on new responsibilities to support the wide range of interconnecting College activities, ranging from recruitment, allocation of trainees, simulation to Faculty and committee support so that the trainee receives the best possible chance to progress through their training and achieve their CSCST. It is also important to acknowledge the input of CAT to the work of the Training Department.

### KEY ACHIEVEMENTS

**EPA DEVELOPMENT**
- Launch of EPA project in our hospitals
- EPA tutor study days and training for SAT 1s
- Development, launch and upgrade of the App and a Digital Resources Hub for online resources
- Transition to hospital – going live with four EPAs and four feedback reports
- Irish Health Care award commendation
- Grant funding awarded by the HSE

**ROTATIONS**
- Completed full review of the rotations template and revised template developed.
- Scope included review of 240 trainee allocations across six-years in 25 hospitals.
- Greater transparency with revised template published on College website
- Reviewed SIY and Post CST Fellowships with a view to centralising the appointment of the SIY posts – pilot under way

**RECRUITMENT**
- Revised applications process with ability to apply through an on-line application system
- Appointments completed with 40 new trainees starting July
- Autumn and spring SLA reviews with NDTP

**INTERNATIONAL TRAINEE PROGRAMME**
- Completion of programme for 2 CPSP trainees with five further trainees mid programme
- Initiation of the Sudan programme with first trainee due to start in July 2018

**OVERSEAS FELLOWSHIP INITIATIVE**
- Completion of the first group of trainees from Oman in July 2017
- Annual Trainee Reviews
- Completed for 2017 and underway for 2018

**MEDICAL CAREERS DAY**
- Attended day co-ordinated by the Forum of Postgraduate Training Bodies
- Information and simulation experience provided

**ADMINISTRATIVE SUPPORT**
- Continued administrative support to Joint Faculty of Intensive Care Medicine of Ireland, Faculty of Pain Medicine, Intensive Care Society of Ireland, Committee of Anaesthetic Trainees (CAT) and the Training and Education, Credentials, Quality & Safety, Research & Academic Committees.
in particular in light of the significant change over the last 12 months.

We also capture the live nature of the current EPA work in the set of infographics presented left and take this opportunity to thank all the consultants and trainees who have engaged in the process this far. In particular, we want to thank the following consultants who worked in the co-design of the EPAs with both Dr Josephine Boland and Dr Elís Condon: Dr Kay O’Brien, Dr Patricia Ecimovic, Dr Rebecca Fanning, Dr David Moore, Dr Kathryn Byrne, Dr Criona Walhe, Dr Ron Charles and Dr Karthikeyan Srinivasan

A particular thanks to Ms Lauren Donohoe for her excellent administrative support and to both Lauren and Ms Máirín Murray of Digital Doddle, for their innovative communication strategy, a sample of which is included in the infographics piece left. I wish to acknowledge the dedicated and untiring work undertaken by Dr Josephine Boland in bringing together all the strands in developing EPAs over the last three years into one document that will function as a key resource for all involved in Competency Based Medical Education in the College.

Dr Camillus Power,
Interim Director of Postgraduate Training
2017 was once again a busy year in the Examinations Office with an expanding overseas portfolio in addition to our examination commitments in Dublin. The committee met formally 4 times during 2017 - January, April, September and December. In addition, committee members and examiners undertook a huge amount of work in their own time – writing questions, correcting scripts, generating reports and developing protocols.

Membership Examinations
Chair Dr D. McCoy

Lead Examiners
MCQ Dr L. Kevin
SBA Dr M. Mugawar; Dr G. Morrison
OSCE Dr P. Connolly
SOE Dr D. Honan (Physiology); Dr C. Murphy (Pharmacology)

MCQ
There were 3 sittings of the MCQ component of the examination during the year. This part of the examination tests candidates’ knowledge in Physiology, Pharmacology and Clinical Measurement. There are 3 x 60 minute MTF papers and an SBA paper. The examination ran concurrently in 6 centres in Dublin, Malaysia, Oman, Jordan, Egypt and Bahrain. A total of 230 candidates sat the MCQ paper in 2017 of whom 121 were successful.

OSCE/SOE
There were two sittings of the OSCE/SOE part of the examination in Dublin. Seventy-seven of a total of 122 candidates taking this part of the examination were successful. There was no exchange examiner at the spring examination. Dr Chris Leng was the Exchange Examiner from the Royal College of Anaesthetists at the autumn sitting.

MCAI Overseas – Oman and Malaysia
In February a delegation from the College comprising three examiners, the President and the Examinations Manager travelled to Muscat, Oman to examine the OSCE and SOE components of the MCAI. We were joined by a number of local examiners. Eighteen candidates were examined of whom nine were successful. An Examiner Training Day was held prior to the start.

of the examination. The feedback from local examiners was excellent.

In November a team of examiners travelled to Perdana University, Kuala Lumpur, Malaysia. Six of 22 candidates were successful. Dr D. McCoy and Dr C. Burlacu also ran a very successful Train the Trainers day.

**Fellowship Examination**

**Chairs**
Dr M. Griffin;
Dr G. Iohom

**Lead Examiners**
- **MCQ**
  - Dr M. Griffin
- **SBA**
  - Dr E. Conway;
  - Dr G. Morrison
- **SAQ**
  - Dr A. Hayes
- **SOE I**
  - Dr R. Whitty
- **SOE II**
  - Dr M. Scully
- **Clinical SOE**
  - Dr G. Iohom,
  - Dr M. Griffin

**Spring examination:**
A total of 91 candidates sat the final fellowship written examination paper in February. This was held in Dublin, Malaysia and Bahrain. It comprised of a 90-minute MTF paper (40 questions, 200 responses), a 60-minute Single Best Answer (SBA) paper (20 questions) and a 3-hour Short Answer Question (SAQ) paper. Thirty-nine candidates were successful. Of the 54 candidates who presented for the SOEs in Dublin, 37 were successful. There was no exchange examiner at the spring iteration of the final examination.

**Autumn / winter examination:**
A total of 106 candidates sat the final fellowship written examination paper in September. This also comprised of a 90-minute MTF paper (40 questions, 200 responses), a 60-minute Single Best Answer (SBA) paper (20 questions) and a 3-hour Short Answer Question (10 SAQs) paper. Fifty-eight candidates were successful. Sixty-four candidates were examined in the SOEs, 44 were successful. There was no exchange examiner.

**Fellowship of the Joint Faculty of Intensive Care Medicine 2017**
Eight of ten candidates were successful.

**Diploma in Pain Management 2017**
Seven of 13 candidates were successful.

**Fellowship of the Faculty of Pain Medicine CAI 2017**
Three of four candidates were successful.

**Medal Winners**
- **MCAI**
  - Dr C. Lyons;
  - Dr S. Murphy
- **FCAI**
  - Dr P. Fennessy;
  - Dr N. Barnwell
- **FIFICMI**
  - No winner
- **FFPMCAI**
  - No winner

**New Developments**
The committee was delighted to welcome two new members during the year – Prof R. Arnett from RCSI who has agreed to act as an advisor on quality assurance matters and Dr G. Morrison who, with a diploma in medical education, provides advice and assistance on question writing and makes a significant contribution to the analysis of each component of the MCAI and FCAI as they are taken by candidates.
Work is ongoing, as part of the overall College strategy, to improve our IT systems in order to enhance the delivery of our examinations.

Some changes to the examination question style and marking are planned for 2018. In the Fellowship Examination Short Answer Question (SAQ) paper, each question will be broken down into three or four components and each component will be scored rather than giving an overall mark for each question. The marks allowed for each component will be detailed on the examination paper and it is hoped that this will assist candidates with their time management. Over the course of 2018 Multiple True False (MTF) questions will be phased out. There will be a concurrent increase in Single Best Answer questions.

In the Membership Examination the number of MTF questions will remain at 90. The number of SBAs will increase over the course of the year to 50.

New equipment was successfully piloted for the Critical Incident and Simulator stations for the Spring OSCE. This has now become an integral part of the OSCE and is used in all iterations of the MCAI OSCE examination.

Towards the end of 2017 it was agreed that College trainees with 12 months prior experience in Irish Training Hospitals can apply to sit Fellowship Examination in year three.

In 2018 the College will be looking at further expansion of the overseas examinations to include China.

**Examiner Recruitment and Education**

We have been fortunate in that we have continued to recruit new examiners throughout the year. All new examiners are required to observe each examination and undergo examiner training prior to commencing formally as a College examiner.

In September, 30 examiners attended the 2017 Examiners Training Day in the College, which was very well received by the examiners. Drs. McCoy, Griffin and Hennessy spoke about the structure of the MCAI and FCAI examinations and there were talks from Prof. R. Arnett, Dr H. McKeague and Dr. G. Morrison on the principles of assessment, question writing and standard setting.

**Thanks**

The workload for both examiners and the examinations office is increasing as we continue to develop our international profile and improve our standard setting procedures and general examination processes.

I would like to extend my thanks to the Vice Chair of the Committee Dr Brian O’Brien, the chairs of each examination and to all examiners for their hard work, loyalty and commitment to the examination process. I would also like to thank the lead examiners and standard setting panel members for all the extra work they undertake.

I wish to acknowledge all members of the Examinations Committee and to thank them for their advice and support throughout the year.

Finally I would like to thank the Examinations Department Team – Mark O’Rourke, Ann-Marie Harte and Eoin Lumsden led by Ms Ruth Flaherty. The smooth running and success of each College examination is hugely dependent on the hard work, forward planning and dedication and support of Ruth and her team and I am very grateful to them all.

**Dr Anne Hennessy**

CEPD-Congress Committee

Prof Donal Buggy, Chair of the CEPD-Congress Committee

Formerly the Education Committee, this committee’s activities include organising the Annual Congress and regular CEPD activities and was re-titled to more accurately reflect its work.

The Annual Congress 2017 was held at UCD’s O’Reilly Hall and adjacent O’Brien Science Building, it included a number of high-profile international speakers, in addition to harnessing the wealth of local talent within our own community of colleagues. The meeting covered a broad range of topics including sessions devoted to obstetric anaesthesia, patient safety, anaesthesia and Alzheimer’s disease, neuro-critical care and perioperative management of lung diseases. The Irish Society of Regional Anaesthesia (ISRA) held their Advanced Ultrasound in Regional Anaesthesia Workshop. We also held a Difficult Airways Workshop for the first time. Dan Sessler, Cleveland Clinic, and Hugh Hemmings, the first non-British Editor-in-Chief of BJA, were the keynote speakers among other international guests.

The Dr Mary Lehane Medal Competition was held during the Annual Congress on the 4th and 5th of May and was awarded to Dr Ciara Hayden for her E-Poster presentation entitled ‘Perioperative glycaemic control and its association with post-operative infection in patients undergoing cardiac surgery on cardiopulmonary-bypass (CPB)’.

The Delaney Medal Competition 2017 which took place during the Annual Congress was won by Dr Thomas for his presentation entitled ‘Do supraglottic airways increase the accuracy of cricothyroid membrane identification in female patients? - a prospective observational study’.

The Abbvie Scholarship 2017 competition was also held during the Annual Congress, the €10,000 scholarship was awarded Dr Stephen Duff. The scholarship supports original research by an Irish anaesthetist provided by Abbvie. A Core Topics Day was held in September, where we continued our live web streaming of these lectures to multiple hospital sites throughout the country.

The Inaugural National Patient Safety Meeting has held on November 17. The KP Moore Competition was held in conjunction with this, and candidates were invited to submit abstracts on the topic of Patient Safety.

The KP Moore Medal was awarded to Dr Martina Melvin for her presentation entitled ‘Neuro-T, a Smartphone App to aid in the safe transfer of the Emergency Neurosurgical Patient to Beaumont Hospital’. The best E-Poster prize was awarded to Dr Timothy Moore for his presentation entitled ‘Lipid Rescue Kit’.

The Winter College Lecture was also held during the Inaugural National Patient Safety Meeting and was presented by Dr Jannicke Mellin-Olsen President Elect, World Federation of Societies of Anaesthesiologists. The title of the lecture was ‘Helsinki Declaration on Patient Safety in Anaesthesiology - What is next in Europe and the World?’.

The Gilmartin Lecture was delivered by Dr Barbara Dawson is Director of Dublin City Gallery The Hugh Lane, the lecture was entitled ‘Who needs art?’.

The Audit Study Day and presentations event took place on the 9th of March and was chaired by Dr Wouter Jonker. The Audit Prizes went to Dr Cillian Suiter, Dr Muhammad Mukhtar. A Difficult Airways Workshop was held on the 22nd of September and was run by Prof Ellen O’ Sullivan and Dr Caithrina Murphy.

The Professionalism in Practice Workshop was held on the 8th of December and run by the module coordinator Dr Barry Lyons. Thank you to all workshop organizers who kindly dedicate their time to ensure the success of these meetings.

As Chairman, I wish to thank all my colleagues who contribute regularly to the committee’s activities, including CAT representative Dr David Devlin. The ongoing support of Ms Orla Doran, Administrative Officer and the President, CEO and Council is as always, warmly appreciated.

Donal Buggy, Chair of the CEPD-Congress Committee
The Quality & Safety Advisory (QSA) Committee is a standing committee of college whose overall aims are:

- To promote and maintain a culture of patient safety
- To provide leadership for patient safety and quality of care
- To provide timely information to support patient safety and quality of care.

**Anaesthetic Activity Audit**

The Annual National Anaesthetic Activity Audit for the years 2014 and 2015 was published in 2017. This project jointly sponsored by CAI and the National Clinical Programme for Anaesthesia and led by Dr. John Cahill provides key information on anaesthesia activity nationally and will continue to be developed and supported by College.

**Safety Issues and Information**

The committee continues to keep members and fellows informed of important safety issues via regular e-newsletters and safety advisory notices. The committee has worked with HSE to ensure implementation of a standardised European cardiac arrest call number (2222) in hospitals throughout the country. The committee continues to work on developing the national safety network – Safe Anaesthesia Network Ireland (SANI).

**NAPSAS 2017**

The inaugural National Patient Safety in Anaesthesia Symposium was held in November 2017 in the college in conjunction with the European Board of Anaesthesiology. The event which was fully booked featured experts from Ireland, the UK and Europe who addressed key safety concerns in anaesthesia. The meeting was opened by Dr Kathleen McLennan, Director of the National Patient Safety Office in the Department of Health. The meeting included the Winter College Lecture which was delivered by Dr Jannicke Melin-Olsen President Elect of the World Federation of Societies of Anaesthesiologists.

The KP Moore medal for the best presentation on a topic related to safety was awarded to Dr. Martina Melvin – Neuro-T, a Smartphone App to aid in the safe transfer of the Emergency Neurosurgical Patient to Beaumont Hospital and Dr Timothy Moore for Best Poster - Lipid Rescue Kit

The Chairman would like to acknowledge the support of the President, Professor Carson and the Council in progressing the Safety & Quality agenda. The Chairman would also like to acknowledge the help and support of the committee members and the College administrative staff.

**Prof Gerry Fitzpatrick**

Chair, Quality and Safety Advisory Committee
It is my pleasure to provide another report as Chair of the Professional Competency Scheme (PCS) Committee. Much has changed on the PCS landscape since last year. In particular, several engagements have taken place, both with the Forum of Postgraduate Training Bodies and with the Irish Medical Council (IMC). We are currently engaged in a new process with IMC to optimise our delivery of PCS services, in accordance with our agreement with them originally arranged under the Medical Practitioners Act 2007.

We continue to audit three per cent of our PCS Registrants randomly, as set out in the IMC Agreement. This process involves our IT Consultants, who provide us with a randomly-selected list of names from amongst those registered. Doctors whose names appear on this list are then contacted by College, and requested to submit evidence of CME activity. The College reviews these submissions and the doctors involved are contacted to confirm compliance. In the event that an individual is not compliant, there is a process whereby IMC are statutorily notified, and they then pursue the matter, in their role as regulator of medical registration.

Just to remind colleagues once again, CAI has decided in the past that Internal CME points may be certified by letter from Head of Department, but external CME points still require the production of a designated CME Certificate, as issued by the appropriate meeting/course organisers. We would once again urge colleagues to ensure that they remain compliant with PCS requirements, as in the past a small number of anaesthetists have been investigated by IMC for failing to engage with the process. When this happens, there is unfortunately nothing that CAI can do to assist these doctors.

This has been another busy year for CME activity, with high numbers of CME/CPD points being approved by CAI for both external courses and College courses. CAI has given a commitment to IMC to continue to make CME opportunities available to our registrants over the PCS year. We also continue to allow application of approved overseas CME credits to CAI PCS activity.

As changes to PCS evolve over the coming year, CAI will advise registrants of these periodically. In the meantime, any colleagues who require further information about the workings of the existing PCS arrangements may contact the CAI PCS Administrator, Ms Sinéad Byrne on sbyrne@coa.ie or under the PCS section on the CAI website.

Prof David Honan
Chair of PCS Committee
This is my third report as chair of the Credentials Committee, which met on two occasions during the year.

The Committee reviews applications on behalf of the Medical Council for the purposes of Registration as a Medical Specialist. The Committee is guided by the Medical Practitioners Act 2007 and European Directive 2005/36/EC. The Medical Council usually supports the College recommendation but retains discretion in the final decision. This process allows doctors who have not taken part in the College of Anaesthesia National Training Programme to demonstrate equivalence of training and experience. Doctors who have recognised Specialist Training Recognition within the EU are entitled to apply directly to the Irish Medical Council for inclusion in the Irish Specialist register.

The Irish Medical Council also accepts applications from doctors who qualified from recognised Medical Schools outside the EU. These applications are forwarded to the relevant recognised Training Body for assessment and require a recommendation in a specified time from date of receipt. Candidates are assessed for competence in clinical modules as well as in nonclinical competencies as outlined in the College document “Competence in Professionalism for Independent practice”.

Applicants may be recommended for immediate registration where documentation is complete. The application form includes substantial and verified evidence of training including rosters, logbooks with a breakdown of caseload and structured references requested by the Committee. There is a Service Level Agreement between the Medical Council and the Postgraduate Training Body, which sets out the timelines within which applications must be reviewed and determined. The fee for such applications to the Irish Medical Council is €4,000.

Assessors undertake the assessment of the applications on behalf of the CAI Credentials Committee. In 2017, the Medical Council referred 11 new applicants to the Committee. These completed application forms were forwarded to the College of Anaesthetists of Ireland for assessment and recommendation. Following assessment, the Credentials’ Committee approved one applicant and following Council approval this was communicated to the Medical Council. The remaining ten applicants were recommended to undertake further training or provide additional evidence and two of these were subsequently approved. Two applications that had been originally submitted prior to 2017 were re-submitted during the year and were recommended for inclusion in the Specialist Register.

As Chair of the Credentials Committee, I convened a symposium at the Congress in 2017 in order to facilitate doctors practising in Anaesthesia in Ireland who might be considering an application to the Medical Council for inclusion on the Specialist Register for Anaesthesia. Approximately 40 doctors attended. The session provided an opportunity for an in-depth discussion on issues facing doctors seeking registration and some important guidance was provided. We intend to run a similar symposium at the 2018 Congress at 12.45 on Friday, 25th May.

The role of The College is advisory and the Medical Council makes the final decision on eligibility for inclusion on the register of medical specialists. The Medical Council has an appeals process for doctors whose applications are refused. The Committee also assists College Council with applications for Ad Eundem fellowship of the College.

I would like to thank Ann Kilemade on behalf of the Credentials’ Committee at the College of Anaesthetists for her wonderful support and help.

For further information on how to apply and the detail involved please contact the Medical Council for an application – or refer to http://www.medicalcouncil.ie/Registration-Applications/

Dr John O’Dea
Chairman, Credentials’ Committee
This year the College has invested in a complete upgrade of IT systems, redeveloping the website, and expanding national and global access to educational meetings.

**CAI Website**

Redevelopment of the website has been a major project encompassing a wide range of functions; it informs trainees and Fellows, manages PCS and logbook data and administers for the exams and training offices. Each area will comply with GDPR regulation and the website content can be updated by administrators within the College. For continuity, the new system is integrated with Filemaker so all integrated features from the old system are available to it. The Safety button has been an important step forward in disseminating updates on patient safety and Prof Gerry Fitzpatrick has championed this advance unfailingly. The new website designed by JET Design will be ready to go live in the second quarter of this year following testing and feedback. It is modernised, practical and future-proofed and we think it will make a real contribution to your professional development and governance.

**CAI App and Educational Events**

Each year so many delegates have planned their conference schedules using the Congress app. This year the College App expands that opportunity to engage with Fellows about all educational events and meetings. The College App will house the Congress app, the EPA app and information on College events. Inclusion of Fellows practicing outside of Dublin and overseas Fellows continues with video links to live college events.

**College Hardware Support**

**Contract and College IT Systems**

Rationalisation and cost effectiveness are under review over this year with a tendering process underway to ensure value for money for IT support. In June 2018 the process of looking at systems for all departments to replace Filemaker will commence and is expected to be a two to three year project. The boardroom audiovisual systems are currently being updated for improved quality and accessibility. The President, Kevin Carson; the COO, Margaret Jenkinson and the CEO, Martin McCormack have driven these projects to completion with vision and determination. I would also thank the College Council members and the CAI departments for their support and work towards the complete upgrade of the College IT projects.

---

Dr Miriam Langdon, Chair of IT & Communications’ Committee
The past year has been a period of growth and development for both the Committee of Anaesthesia Trainees and the College in general. I must commend the College with regard to its ardent engagement of trainees and our issues at every level of the organisation. The support and engagement with trainees on a wide variety of issues is of key important to trainees and the College alike. The College continues to pave the way for other Post-Graduate Training Bodies in the way in which it works with and for trainees.

CAT Calendar
We continued to run and grow our repertoire of events over the past year; making contributions to the Anaesthetics Induction Day for new trainees, helping to give them an introduction to the training scheme; we also attended the National HSE Careers Day (special thanks to Drs Owens, Purcell and Singleton), extolling the benefits of a career in Anaesthesia, Intensive Care and Pain to medical students who attended from around the country as well as to the College Open Day, held annually in November.

Again, this year, the committee has participated in the organisation of an Interview Skills workshop, which continues to be one of our most popular events, and the development of a symposium session at the College’s Annual Scientific Meeting. We intend to run our now famous Fun Run event again this year – last year this event, along with the cycle raised €2,800 for charity.

I must take this opportunity to sincerely thank Ms Orla Doran of the College; I have been plaguing her for two-years now on the CAT, and she has always been so helpful, so well organised and so approachable – none of the events that we organise or participate in would be possible without her continued diligence and hard work.

Communication with Trainees
The Lead Anaesthesia Trainee (LAT) network is now well established as a port of call for direct communication from teaching departments around the country to the CAT and the College in general. I am very grateful to the hard work that Dr Moran put into keeping the LAT network alive and active over the past year.

Special mention must go to Dr Vingares, who edited the CAT Newsletter again this year. We published a quarterly bulletin on trainee issues, such as fellowship opportunities, case reports, and updates from the College. This year we updated the distribution methods of the newsletter to increase its circulation and impact.

Trainee Issues
The College actively engaged with the CAT in relation to changes to the way in which rotations were distributed and developed and accepted points of feedback throughout the process. We welcome the new approach and transparency to the division of placements and are very grateful to Ms Ann Kilmade and Dr Power of the Training Department for the opportunity to engage on this issue and the hours of graft that they have put in to this project, assessing all the permutations and combinations of placements, making them as fair and equitable as possible.

We also undertook work with the Training Committee in relation to the formalisation of the position and application procedure for Special Interest Years and Fellowships in Irish hospitals. This has streamlined the application process and will mean that rotations are known further ahead of time than previously.

An update to the logbook system is afoot in the College, with contributions to this valuable trainee portfolio system being made on behalf of trainees through the Committee by Dr Vingares.

One of the key issues affecting trainees today is fatigue and burnout. I must commend Dr Kelleher for his active work and engagement as a co-opted member, representing us at the Irish Standing Committee and Group of Anaesthesia Trainees in the AAGBI. He has undertaken work on fatigue in the Irish context and highlighted the issue as one of the utmost importance. As a result of this work, the College has endorsed the Association’s guidelines and policy in relation to fatigue amongst anaesthetists.

Following the Bawa-Garba case in the United Kingdom, the College has made moves to address the issues affecting trainees today. I must commend Dr Kelleher for his active work and engagement as a co-opted member, representing us at the Irish Standing Committee and Group of Anaesthesia Trainees in the AAGBI. He has undertaken work on fatigue in the Irish context and highlighted the issue as one of the utmost importance. As a result of this work, the College has endorsed the Association’s guidelines and policy in relation to fatigue amongst anaesthetists.
surrounding supportive training and reflective practice. A Hot Topics evening is planned for late April; and it is hoped that a position statement from the College will be forthcoming from this meeting. I must thank Mr Martin McCormack, the College’s CEO for his work in this matter. It remains to be seen how the Bawa-Garba case will impact on Irish clinical and educational practice, and we will continue to represent trainees’ interests at College and national level in this issue going forward.

Mr McCormack has also raised several trainee issues with the HSE directly, such as P45 delays, centralised payroll and course refunds; and we are grateful for his efforts on these issues.

The Entrustable Professional Activities project continued to grow and develop this year. The College aims to move to a more robust system of low-stakes workplace-based assessments over the coming years. We have been actively involved in the project, providing feedback, and questioning logic as well as participating as facilitators at the Tutor Training Day. I would like to thank Drs Josephine Boland, Eilis Condon and Camilus Power for their continued hard work on the project. It represents an important step forward in the way in which we, as trainees, will develop our skills portfolio in the years ahead.

This year the Specialist Anaesthesia Trainee Audit and Research Network (SATARN) succeeded from the auspices of CAT and is now headed by Dr Pierce Geoghagan. Its continued development represents an important step for trainee research opportunities in Ireland, and we wish them every success with their on-going projects.

Dr Sinead Farrell has undertaken work in relation to the improvement of patient safety during transport of the critically ill patient, having attended courses and conducted surveys of trainees in relation to their experiences. I am hopeful that her project will bear fruit over the coming year.

Conclusion

As I alluded to previously, much of the work, activities and projects undertaken by the CAT would not be possible without the continued and on-going support from the staff at the college, and I must thank Lauren Donohue for all of her efforts over the last year. I would also like to thank Prof Kevin Carson, Mr Martin McCormack, Dr Brian Kinirons, Dr Camilus Power and Dr Anne Hennessy and the other members of Council for all of their support, tips, winks and nods over the last year; steering me in the right direction (from time to time!). I am grateful to have had the opportunity to work with you all.

As I step down from my role as chair of CAT, I would like to thank Ms Margaret Jenkinson for keeping us out of the red. To the chairs of the other College Committees, almost too numerous to name, I am grateful for the opportunities you have afforded CAT to participate in your respective projects and decision-making processes.

I wish the incoming committee, of which there will be seven new members following election, the very best of luck with their endeavours and projects over the coming year.

Dr David Devlin,
Chair of Anaesthesia Trainees Committee
Establishment of the Specialist Register in Intensive Care Medicine.

Discussions continued through 2016 with the IMC culminating in submission of its specialty training programme for accreditation to the IMC in September 2016. In September 2016, JFICMI met with Professor Eilis McGovern of the National Doctors’ Training Office, who agreed that the HSE would fund 14 trainees in Intensive Care Medicine over a two year programme from July 2017. The JFICMI Accreditation team met with the IMC Accreditors in January 2017. Following this meeting there was further engagement with the IMC through 2017 with submission of a revised application, addressing the comments of the IMC team. At the time of writing this report the process is close to being finalised.

Opening the Specialist Register in Intensive Care Medicine is dependent on accreditation of the training programme as the training programme is the benchmark against which a Level 5 assessment will be made for applicants to the Specialist Register in Intensive Care Medicine. Graduating trainees will be entered onto the Specialist Register through the completion of Specialist Training. All other applicants will have to undergo Level 5 assessment.

The College of Anaesthetists has agreed to be the Training body within which the Faculty exists for governance purposes.

Tenure of the Dean and Board Members

The Board agreed to extend the tenure of the Dean to three years and the Board members to five years, renewable by election for a further five years. The changes have been incorporated into the Memorandum and Articles of Association.

Examinations

Dr Andrew Westbrook continued as Chair of the Examinations Committee and the JFICMI representative to the EDIC committee. The Fellowship Examination of the JFICMI was held in May 2017. Ten candidates sat the examination of whom eight were successful. The successful candidates listed below will be conferred in May 2018.

Training

Dr Brian Marsh is Chair of the Training Committee. Drs Brian Marsh and Enda O’Connor undertook a review of the training syllabus and have written a revised curriculum, which formed the major part of the submission to the IMC Accreditation Review team.

Education

Dr Donal Ryan is convener of the Refresher Courses. The Faculty is partnering with the ICSI Annual Scientific Meetings.

Honorary Fellowship

Professor Martin Tobin was conferred with an Honorary Fellowship in June 2017 at the Annual Scientific meeting in Belfast in recognition of his contribution to pulmonary critical care.
Accreditation
Beaumont Hospital was inspected in 2017. The Board recommended that it be approved for one year’s ICM training.

Website
There was further development of the website with the trainee logbook coming on stream. Dr James O’Rourke has taken on responsibility for managing the website, assisted by Dr Dermot Phelan.

Finance
Dr Maria Donnelly continues as Honorary Treasurer with her term finishing in 2018. Fees were set at €180 for consultants, €90 for overseas members with Trainees of the CAI, RCPI, RCSI (incl EM) wishing to become a registered trainee of the JFICMI – €100 once off payment.

Members in good standing are entitled to 1 free Refresher course, 10% reduction in meeting fees and free online learning.

JFICMI accounts are audited as part of the CAI financial audit.

National Critical Care Programme Report to the Board - Dr Michael Power
Dr Michael Power, National Clinical Lead, is a co-opted member of the Board. He has kept JFICMI apprised of HSE developments.

The Medical Advisory Committee to NCCP is chaired by the Dean of JFICMI

National Office of Clinical Audit (NOCA)
Dr Rory Dwyer chairs the Intensive Care Audit Governance Group in NOCA. The roll out of the national audit of Intensive Care continues. Reporting commenced in 2017.

The Dean represents the JFICMI on the NOCA Governance Committee, the Major Trauma Audit Governance Group, National Audit of Hospital Mortality and the Intensive Care Audit Governance Group.

Staff
Ms Maria Golden, Senior Administrator for the Board resigned in January 2017. I would like to acknowledge her contribution to JFICMI during her 9 years in the College. Ms Ann Kilemade and Ms Rebeca Williams provided our administrative support in 2017. The Examinations Office continues to support both the Fellowship examination of the Joint Faculty and the European Diploma in Intensive Care Medicine. On behalf of the Board I would like to thank the staff of the College of Anaesthetists, who support the work of the Faculty.

The Joint Faculty would also like to thank Board Members, Course organisers, faculty and indeed participants for contributing to another vibrant and effective year.

Dr Jeanne Moriarty, FFARCSI, FJICMI, FRCA, FAMM (Hon)
Dean JFICMI

Successful JFICMI Candidates-2016
Immanuel Hennessy
Aoife Quinn
Laura Flood
Bairbre McNicholas

John Fitzgerald
Michelle O’Mahony
Bill Walsh
Aoife Lavelle

JFICMI Events
Pre-exam courses:
2017: MMUH 1st March
St Vincent’s University Hospital 2nd March
St James’ Hospital 3rd March

Critical Care Refresher Courses:
2017: COA 27th April
COA 21st September

Irish Donor Awareness Programme:
2017: COA 25th April

Basic Critical Care Echocardiography Course:
2017: MMUH March 29th - 30th
MMUH November 16th – 17th

Joint ICSI-JFICMI Annual Scientific Meeting
2017: June 9th - 10th Belfast
The Faculty held four board meetings during the year. The Annual Scientific Meeting was held in the College of Anaesthetists on the 10th February (113 in attendance) and The Royal College of Physicians on 11th February (180 in attendance). Professor Andrew Rice was awarded the Rynd Medal and delivered the Rynd Lecture.

The Clinical Research Medal in Pain Medicine competition took place. Five submissions were shortlisted and Professor Rice was the adjudicator. Dr Jonathon Royds from St. James Hospital was awarded the Clinical Research Medal in Pain Medicine. The conferring ceremony took place in the College of Anaesthetists.

Fourteen candidates had sat the Part 1 FPM exam and seven were successful. Four candidates had sat the Final FPM exam and three were successful.

Dr Hugh Gallagher completed his term of office on the FPM board as ICGP representative and will be replaced by Dr Ide Delargy in 2018. The board expressed thanks to Dr Gallagher for the significant contribution he made to the board with particular reference to his teaching on the FPM training courses regarding addiction.

The exam revision course was held in the college in May with a demonstration in the TCD Anatomy lab.

The external examiner was Dr Shyam Balasubrahmanian from Birmingham, UK. Dr Shyam Balasubrahmanian delivered a lecture on optimising analgesic selection in the management of chronic pain as part of the Summer Faculty meeting.

Work continues on the IMC submission document. It is hoped to conclude this process in 2018.

The interview for the National Training Scheme in Pain Medicine was held in December in the College. One appointment was made to the SIY programme and three to the Fellowship programme. This interview process was the most competitive yet.

Professor Connail McCrory
Chair of Faculty of Pain Medicine
SIMULATION TRAINING (CAST)

Mandatory simulation courses for SATs and other simulation-based educational events

Three hundred participants took part in 33 simulation courses in 2017 (Table). The vast majority of these courses took place in the College of Anaesthetists Simulation Centre, and were attended predominantly by SATs. We also trained a small number of CPD-SS doctors and International Fellows.

Simulation continued to be a very well received component of several other internal and external educational events such as the Introduction to Anaesthesia Course, Difficult Airway Management Course, Foundation Course for Anaesthesia and Recovery Nurses, Anaesthesia Information Day and Medical Careers Day.

We delivered the annual A-Crisis for Consultants, which was attended by seven consultants. The Train the Trainer Simulation Instructors Course proved to be very popular again, and was attended by a record number of 19 participants belonging to multiple disciplines and specialities.

MCAI OSCEs

In 2017, at the request of the Examination Chair and Committee, we introduced new screen-based Simulated Monitoring (SM) and Critical Incidents (CI) OSCEs at the MCAI examination. These OSCEs are using state-of-the-art ALSi machines, special scripts and marking sheets, which were designed, piloted and validated by the CAST team.

Awards, Presentations and Publications

At the Education Awards 2017, the submission with the title ‘The College of Anaesthetists Simulation Training Programme – Activity and Quality Report 2010 – 2016’ was finalist under both Best Student Experience Awards and Best Use of Educational Technology/ICT Initiative of the Year categories. Several scientific abstracts were accepted and presented at international meetings as in the following:

1. Sim is stressful! What is the incidence of stress experienced in medical simulation training, and does the perceived stress of participants during simulation negatively affect

European Society of Paediatric and Neonatal Intensive Care (ESPNIC), 2017

1. Confidence following paediatric ICU simulation training in Ireland from 2010-2016, a semi-quantitative retrospective analysis. Poster Presentation. Greaney D, Burlacu C, Harte S.

At the time of writing this report, I am also delighted to report that The College of Anaesthetists of Ireland Simulation Training programme: a descriptive report and analysis of course participants’ feedback’ has been published in the Irish Journal of Medical Science. To read the full paper in .pdf format interested readers should go to http://rdcu.be/JwY5

Development and Equipment

In 2017, the CAST programme was successful in securing funding from HSE-NDTP for the purchasing of new high-fidelity simulation equipment. We are delighted to welcome a three-member wireless SimFAMILY to the College (SimMan 3G, SimMom and SimJunior).

In the second part of 2017, half of the joint CAI-RCSI MASCOT courses were for the first time delivered in the RCSI National Surgical Training Centre. Our CAST Faculty and Nurses were present in York Street to support the delivery of these courses.

Collaboration

In the second part of 2017, half of the joint CAI-RCSI MASCOT courses were for the first time delivered in the RCSI National Surgical Training Centre. Our CAST Faculty and Nurses were present in York Street to support the delivery of these courses.

On a similar note of collaboration and partnership, Dr Crina Burlacu co-delivered a workshop with the title ‘Simulation faculty recruitment, development & retention’ at the Irish Association for Simulation Symposium 2017, which took place in ASSERTS UCC. She was invited to chair a session and co-judge posters at the Northern Ireland Human Factors and Simulation Network (NIHFSN) meeting in Belfast.

Acknowledgments

Firstly, I would like to acknowledge the unconditional and expert support of our Course Leads and Simulation Faculty, which continues to make the CAST programme possible.

Secondly, I would like to extend my special thanks to our nurse assistants Ms Louise Kelly and Ms Deirdre Flynn. At the time of writing this report, Ms Louise Kelly is just after leaving the programme to dedicate more time to her family. Louise has brought a major contribution to the development, implementation and delivery of the CAST programme over a seven-year period. She has supported me personally as well as Course Leads, Faculty, Fellows and nurses with her professionalism, assiduousness and friendship.

A special thank you goes to our Simulation Fellows: Dr David Greaney, Dr Aine Cafferkey, Dr Elizabeth Coyle, Dr Aoife Lavalle, Dr Montasser Ghazy and Dr Ruth Vaughan. I wish to welcome Ms Sinead Byrne who joined our team in 2017 in an administrator role.

Finally, I would like to thank Prof Kevin Carson, Mr Martin McCormack, Ms Margaret Jenkinson and all the other College staff for their continuing collaboration and support.

Dr Crina Burlacu,
Director of CAST Programme

## EDUCATION CALENDAR 2018

### January
- **23rd February**  
  Faculty of Pain Medicine, The Annual Francis Rynd Lecture, CAI
- **24th February**  
  Faculty of Pain Medicine ASM, RCPH

### February
- **24th & 25th May**  
  Annual Congress of Anaesthesia and Annual Dinner, Dublin Castle

### March
- **9th March**  
  Regional Anaesthesia Update 2018 & Ultrasound Workshop, CAI

### April
- **16th April**  
  CAF Consultant Interview Workshop, CAI
- **19th & 20th April**  
  Beyond BASIC, CAI
- **27th and 28th April**  
  Western Anaesthesia Symposium, Knockranny House Hotel, Westport, Co Mayo

### May
- **8th June**  
  Train The Trainer Simulation Instructors Course, CAI

### June
- **14th December**  
  A Crisis Simulation Course for Consultants, CAI
- **14th December**  
  ISRA Consultant Foundation Workshop, CAI
- **7th December**  
  Gilmartin Lecture, CAI Date TBC

### July
- **9th March**  
  Regional Anaesthesia Update 2018 & Ultrasound Workshop, CAI

### August
- **16th November**  
  National Patient Safety Conference, KP Moore Medal Presentations & WCL, CAI
- **17th November**  
  Irish Standing Committee Meeting, Venue TBC

### September
- **26th September**  
  Irish Pain Society, Annual Scientific Meeting, Dublin
- **September**  
  Echocardiography Workshop, Mater Hospital, Date TBC
- **12th – 15th September**  
  36th Annual ESRA Congress, Convention Centre Dublin
- **20th – 28th September**  
  AAGBI, Annual Congress, Convention Centre Dublin
- **September**  
  Care Topics Day, CAI TBC

### October
- **8th – 12th October**  
  20th Dingle Conference, Current Controversies in Anaesthesia & Peri–Operative Medicine, Dingle, Kerry
- **13th – 17th October**  
  ASA, San Francisco, USA
- **19th October**  
  Difficult Airways Management Workshop, CAI

### November
- **16th November**  
  National Patient Safety Conference, KP Moore Medal Presentations, CAI
- **17th November**  
  Irish Standing Committee Meeting, Venue TBC
- **November**  
  Local Anaesthesia for Ophthalmic Surgery Workshop, Royal Victoria Eye & Ear Hospital, Dublin, Date TBC
- **3rd November**  
  Intern/Medical Student Anaesthesia Information Open Day, CAI
- **November**  
  Professionalism in Practice Workshop Date TBC
- **16th November**  
  National Patient Safety Conference, KP Moore Medal Presentations & WCL, CAI
- **17th November**  
  Irish Standing Committee Meeting, CAI
- **22nd & 23rd November**  
  ICSI BASIC Course, CAI
