## CAISC

**College of Anaesthesiologists of Ireland Sustainability Committee**

- ✓ Excellence in patient safety is at the core of the practice of anaesthesiology.
- ✓ The College recognises that individual patient safety is inextricably linked with environmental safety.
- ✓ We recognise that the speciality has a disproportionately high impact on the environment.
- ✓ Our duty to 'first do no harm' extends to the community and to future generations.
- ✓ For these reasons, The College feels responsible for advocating for change towards more sustainable practice
